TRANSFORM YOUR SPACE

From bathrooms, kitchens and living areas to entrance halls, patios and pools, adding carefully selected tiles to both indoor and outdoor spaces can elevate your home from being merely ordinary to simply extraordinary.

Created for price-conscious individuals who are not prepared to compromise on style or quality, the Affordable Tile Collection allows you to create beautiful interior and outdoor spaces without blowing the budget.

Sourced from leading European suppliers, our collection is curated in line with global design trends and created to work with different design aesthetics. With numerous options to choose from in a variety of stunning materials and finishes, from cement, marble and stone to wood, terrazzo and ceramic, and in different shapes and sizes, you can be guaranteed to find the perfect complement to your individual sense of style.

Be inspired by on-trend room sets, design-led mood boards and our well-stocked tile galleries at the SANIPEX A&D GALLERY located in the heart of Chelsea or visit www.sanipexgroup.com.

TECHNICAL INFORMATION

Advice on laying, grouting and maintenance

IMPORTANT NOTE: TILES SHOULD BE LAID AND GROUTED ONLY BY PROFESSIONAL TILE LAYERS.

Tiling

Follow the simple rules below to guarantee perfect tiling results:

- 1) Check the floor slab is flat where the tiles are to be fitted.
- 2) Ensure that the tiles are correct as per it's intended use before laying.
- 3) Dry lay the tiles, ensure intended lay-out will be achieved, mix if necessary by taking them from several boxes to achieve best results, before actual installation.
- 4) Use the correct adhesive and application tools, apply as per it's manufacturer's recommendation.
- 5) For installing wall tiles, it is highly recommended to use class C2 adhesives, in compliance with the European standard EN 12004. Specifically, recommended is a white glue for nonslip ceramic covering materials.
- 6) For top-class results, add an elasticator, taking care to follow the manufacturer's instructions to the letter, and apply an even layer of glue on the underside of the tile. The thickness of the glue can be adjusted using the toothed side of the trowel.
- 7) Do not leave air pocket between substrate and the tiles.
- 8) Follow recommended joint for tiles.
- 9) Handle the tiles with care before and during tiling.

Grouting

Use matching grouts – follow recommended joint space. The tiler should strictly follow the grout manufacturer's instructions on application and cleaning.

Cleaning

Use cleaning tools that are perfectly clean themselves. Always rinse off surfaces. Use clean water alone if the surface is washed frequently.

Recommended Joints:

Outdoor	5-6 mm approx,
Rectified (Indoor)	Minimum 2 mm
Non-Rectified (Indoor)	3-4 mm approx.
Haxagon or similar shapes	3-5 mm approx.
Modular pattern(mix of sizes)	3-5 mm approx.

For tiles more than 30cm width, with a lengthwise tiling layout, maximum 1/3 offset between panels.

For more information please contact our sales team.

Dimensions Tolerance					
Porcelain -Technical Specifications			Standards	Values Required	
				Non-Rectified	Rectified
Sizes Dimensions		Length and Width	ISO 10545-2	±0,6% ,max 2mm	±0,3%, max 1mm
		Thickness		±5%, max 0,5mm	±5%, max 0,5mm

What is R (non slip) rating?

INTERNATIONAL STANDARD OF RAMP TESTING ON RESISTANCE TO SLIPPING OF TILES WHEN EXPOSED TO DIFFERENT LEVEL OF MOISTURE

Matt R9 - R10
Grip R11-R12

TERMINOLOGY

Rectified

Tiles with straight edges, allows tiling arrangements with very narrow joints.

Calibre

It's the facial dimension (size) and is measured with a tool called a caliper. Using different caliber sizes results in a variation in grout joint widths.

Water Absorption

Measurement of how much moisture a tile is likely to absorb on on-going basis.

Stain Resistance

Method applicable to all working surfaces of tiles to determine their resistance to stains after 24 hours of applying a staining agent.
