CIRCLE OF LIFE_

BY TABLEPLACECHAIRS_

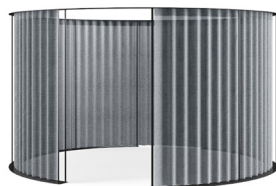

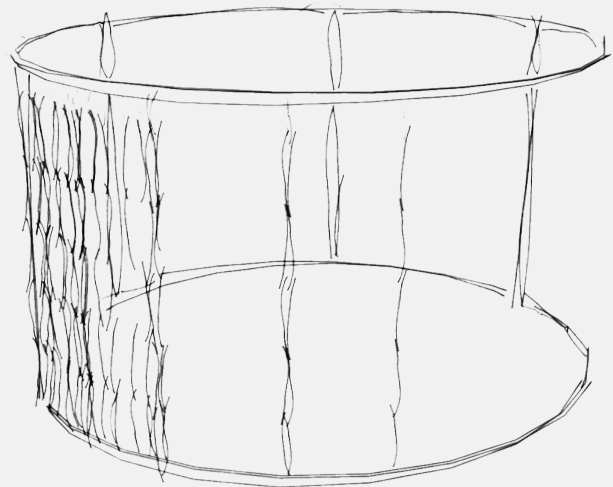

it started with a sketch_

innovative.

Introducing the Circle of Life, a structural free standing framework with hanging recycled plastic curtains, the sustainable answer to partitioning walls.

A great place to have impromptu meetings and quiet times.

MANUFACTURING & TESTING

PRODUCT ON SITE

#1_ a winning design

“Love the freestanding element and the softness of the materiality. Low impact on the design of spaces, i.e. don’t have to impact the Cat A but also a great way to divide up space.”

Kate Vine

“Love the human subconscious, yes by wrapping something around them makes them feel more secluded... yes it does really work, plus executed very nicely here, rather than farming it out as a bespoke object”

Dominic Dugan

“Brilliant alternative to the abundant glass meeting room. A meeting space without walls, this product will fit seamlessly in the next generation of the office space”

David Jackson

materials & customisation_

sustainable.

It's responsibly sourced with curtains from recycled plastics. By reducing the need for partitions & plasterboard this product helps tackle the massive 60% of all landfill which comes from construction waste. Lastly its frame and curtains are 100% recyclable at end of life.

**USED PLASTIC PET BOTTLE
CURTAINS AVAILABLE IN
DIFFERENT COLOURS. 100% PET.**

ALSO AVAILABLE IN AN ACOUSTIC FABRIC.

agile.

The modular freestanding system can be extended, reduced, moved and taken to new locations at any time without interfering with lighting, HVAC or flooring. Faster and more cost effective than traditional office alterations.

Available in three pre-set configurations for ease of ordering
