THE COMPANY

LAUFEN stands for swissness, quality and design, offering complete bathroom solutions around the world.

LAUFEN IN FIGURES

Laufen Bathrooms AG is a Swiss company specialised on premium segment solutions for bathrooms. The headquartes are located in Laufen near Basel. Managed by the family-owned Roca group since 1999 Laufen runs 7 manufacturing sites in Central Europe, 2500 employees and sales offices in 44 countries.

1 Palomba Collection, 2012
2 Living Square, SaphirKeramik, 2013

**MAKING THE BATHROOM
A LIVING ENVIRONMENT**

The personality of this highly traditional Swiss brand reflects a symbiosis of design, quality and functionality. LAUFEN, the premium brand under the ROCA umbrella, is one of the world's leading manufacturers with a global distribution network. The company's core competence is its knowledge in the area of sanitary ware manufacturing. Over 120 years, the LAUFEN brand has been using the oldest malleable material known to man to make innovative sanitary products in state-of-the-art plants with legendary Swiss precision. Knowledge of the bathroom as a whole developed from the competence of LAUFEN in ceramics manufacturing, and sophisticated design. What makes LAUFEN products unique at the first glance is that their Swiss design unites two major design trends: emotional Italian design from the south and the northern tradition of design precision and clarity. For LAUFEN, quality has two aspects: manufacturing knowledge and high degree of practical benefit that the finished bathroom affords the customer – which is often not immediately apparent. LAUFEN, a Swiss company manufacturing products that allow water, a precious resource, to be used sparingly, demonstrates in this manner a commitment to preserving natural resources and environmentally-friendly production.

- 1 The first one--piece, floorstanding washbasin ILBAGNOALESSI One, 2001
- 2 The LAUFEN Forum is a 6,500 cubic metre architectural statement, a visitor and presentation centre designed by Basel based architects Nissen & Wentzlaff, photographed by Maurizio Marcato.

FROM HUMBLE BEGINNINGS TO TODAY'S GLOBAL PLAYER

When Laufen was founded in Switzerland in 1892, sanitation was still a far cry from the standards and comforts offered today; standards, which were particularly influenced by Laufen, the only sanitary ceramics producer that manufactures exclusively in Europe.

Some of the production facilities that belong to the company today can be traced back even further into history. In 1878 for example, the pioneer in the mechanical manufacture of sanitary ceramics was a production site belonging to the Austrian monarchy.

It is not just tradition, but also the strong anchor the various European manufacturing sites maintain in their domestic markets, Switzerland, Austria and Czech Republic, that underpin the quality of Laufen as a company. Laufen's goal then was the same as today's: to lead on technology, service and design. Back in the 1980s, Laufen engineers invented the most efficient high-pressure casting technology for ceramic production and therefore ensured a sustainable breakthrough in industrial production.

Just as important at Laufen are the constant developments in design: wall-mounted WCs and floor-standing washbasins have enabled a new sense of aesthetics. In 2013 Laufen's world wide material innovation SaphirKeramik succeeded in revolutionising the design language of ceramic.

The innovative and valuable SaphirKeramik formulation gives the starting material unprecedented possibilities and scopes. SaphirKeramik is used when a design includes thin walled shapes and tight radii.

Laufen has extended its expertise and its portfolio of ceramic products, bathtubs, furniture and accessories to include faucets. In 1854 Charles Kugler founded a small company for brass products in Lausanne. The first water and gas fittings on Swiss soil were made there in 1863. Since 2009 faucets have been produced at the newly built factory in Laufen.

A BUILDING OF GREAT SYMBOLIC VALUE

Laufen is synonymous with perfection in terms of form and craftsmanship and for advanced technology with an unobtrusive face. LAUFEN's headquarters in the Baselland canton reflect this identity. Ludovica and Roberto Palomba designed "bowl/08", a wash-basin for the Palomba Collection.

Architects Nissen & Wentzlaff created a larger version of this object in the form of the building which stands out with its impressive exposed concrete and elegant statics.

An inventive spirit and desire for technical innovation are also part of the building's concept and (just like the manufacture of LAUFEN's products) require efficient resource usage and an acceptable ecological footprint. As a result, the multi-award-winning building is an outstanding feature in the Basel area which is rich in superb architecture.

With the Forum, LAUFEN has created a new architectural setting for its products: it is a comprehensive architectural statement in concrete with the bathroom at its centre and acknowledges Switzerland unequivocally as the company's headquarters and production site. A space for the bathroom with the power to inspire clients, architects, retailers and tradesmen alike and provide a source of information.

This is also the home of the training centre of LAUFEN Bathrooms AG. A wide range of seminars is held here to train groups and communicate product knowledge. Training sessions also take place in the Sky Gallery in Wilhelmsburg, Austria, and in Znojmo in the Czech Republic.

LAUFEN won the "Award for Marketing + Architecture" in the category "Office and commercial buildings - industrial and commercial interiors" in 2010. It also won the Green Good Design Award and, in 2011, the "best architects award 2011" in the category "Business and Industrial Buildings".

FREEDOM TO RESHAPE

Launched in 2013, Saphirkeramik is pioneering Swiss company LAUFEN's latest innovation. This revolutionary, ceramic material reaches its exceptional hardness blended with corundum, a colourless mineral, which is a component of sapphires. This gives SaphirKeramik a flexural strength equal to that of steel. Yet it has the potential to be wafer-thin, giving designers almost infinite freedom to experiment – and tear up the rulebook of bathroom design. With over two years' experience of producing SaphirKeramik pieces on an industrial scale, LAUFEN is now stretching the patent-pending material's limits by exploiting its super-fine forms not only to create exquisitely detailed textures and patterns but also by engineering the innovative material to increase its maximum size – a 120 cm-long washbasin in SaphirKeramik is the largest to date. LAUFEN has also applied its impressively efficient, high-pressure casting technology to other, high-volume pieces in SaphirKeramik. In collaboration with cutting-edge designers Konstantin Grcic and Toan Nguyen, LAUFEN unveiled design prototyping at such prestigious design events as the Milan Furniture Fair, Art Basel / Design Miami and London Design Festival 2014. Visitors appreciated the wondrous qualities of ceramic – its tactile appeal, luminosity and enduringly spotless surface – and SaphirKeramik's bewitchingly thin and robust walls.

BENDING STRENGTH

Source: Bundesanstalt für Materialforschung und Prüfung, Berlin, 2011

IMPACT ENERGY

Source: Keramik-Institut GmbH, Meissen, 2011

SaphirKeramik

Proven sanitaryware

Simultaneously hard and malleable, SaphirKeramik enables pieces to be made with very thin, yet very strong walls of only 3–5 mm, as well as with narrowly defined radii of only 1–2 mm. The slim profile of SaphirKeramik means that it saves space, is light and environmentally friendly. The new design characteristics of this innovative material are rooted in its exceptional hardness and strength. When the mechanical properties of the two traditional sanitary ceramic masses – namely vitreous china and fine fire clay – are compared, the performance of SaphirKeramik is unique even in international comparison. The comparative values measured by the Federal Institute for Materials Research and Testing in Berlin (BAM) for SaphirKeramik are, at an average of over 120 MPa, comparable with carbon steel and twice as high as for vitreous china.

- 1 Production site for the manufacture of SaphirKeramik in Gmunden (Upper Austria)
- 2 Kartell by Laufen washbasin, SaphirKeramik, 2015
- 3 The thin-walled SaphirKeramik was tested for impact resistance at the Keramik Institut Meissen
- 4 SaphirKeramik has a two to three times higher bending resistance than traditional ceramics

AWARDED DESIGN

The aesthetic design and the high creative product quality of LAUFEN products have already convinced a large number of international judges and independent organisations and resulted in awards for individual products, whole series, innovative materials and show rooms.

THE PRODUCTION

Global network with local service

- LAUFEN subsidiary
- Worldwide export

PRODUCTION EXCLUSIVELY IN CENTRAL EUROPE

- 1 The company is named after the town of Laufen near Basel in Switzerland where it has produced washbasins, bidets and toilets in sanitary ceramic for 120 years. The management of LAUFEN Bathrooms AG, faucet production, training centre and the LAUFEN Forum are also located here.
- 2 The production facility in Gmunden specialises in the manufacture of highly sophisticated bathroom sanitary wares. The Gmunden facility has acquired this expertise through a long tradition in ceramics production.
- 3 English earthenware was already produced in 1795 in Wilhelmsburg, Austria. Today, this factory practises the fine art of sanitary ware production.
- 4 The state-of-the art factory in Znojmo, in the Czech Republic, produces high quality bathroom ceramics. This factory has a long tradition which goes back more than 130 years.
- 5 Bechyně is not only the home of the oldest vocational school of ceramics in the Czech Republic, it is also a modern factory where high quality ceramics have been produced for more than 50 years.
- 6 LAUFEN ceramics products are produced in accordance with strict LAUFEN quality standards (LQS) at the state-of-the-art Roca Group factory in Gliwice.
- 7 In addition, LAUFEN bathtubs are made of acrylic and mineral cast materials in Gryfice, Poland.

SUSTAINABLE QUALITY

Environmentally-compatible production of durable and resource-saving products

ECONOMIC WATER FLUSH SYSTEMS

LAUFEN's 4.5/3-litre toilets meet all functional requirements defined by international standards EN 997 Class 1 Type 5, EN 997 Class 2 and SAI/Wels 4 Stars.

Please take into consideration your local requirements that can vary from country to country

Find further information in the chapter Product features and benefits.

EUROPEAN WATER LABEL

The database of the European Water Label provides architects, planners and consumers with a comparative tool that is valid in the whole of Europe and that allows them to evaluate the water consumption of a water-using product in the bathroom or kitchen at a glance.

Find further information in the chapter Product features and benefits.

ENVIRONMENTAL PROTECTION STANDARDS

Since 1998, LAUFEN has continually monitored the use of resources in all its internal and external processes. Targeted measures and appropriate investments promote the efficient and sustainable use of manufacturing resources. Important key environmental protection indicators now clearly show that LAUFEN production sites fulfil the legally-prescribed environmental protection standards, and in most cases also exceed them.

CERTIFICATION

The first two LAUFEN production facilities were successfully ISO 14001 certified and EMAS registered in 1997. Both of these factories were awarded the European Environment Prize 2007 for exemplary environmental management.

All the LAUFEN production facilities are now certified with the Environmental and Quality Management Systems ISO 9001 and ISO 14001.

SWISS QUALITY

Products with the Q-Plus certification meet both the European standard and the established more stringent Swiss suissetec/VSA standard. LAUFEN sanitary ware products meet these Swiss quality standards and have been recommended for approval accordingly.

IL BAGNO **ALESSI** One

The architect and designer, Stefano Giovannoni, born 1954 in La Spezia (Italy), lives and works in Milan. His work has received international acclaim. A number of his designs can be found in the permanent collections of the Centre Georges Pompidou in Paris and the Museum of Modern Art in New York. According to Alberto Alessi, the Managing Director of ALESSI, Giovannoni is one of the few designers who understands how to combine the unusual with the popular, which is also why he was commissioned to develop the first complete bathroom scenario for ALESSI.

DESIGN PLUS

The iconic washbasin from the collection is also available as a countertop washbasin in 90 cm and 120 cm, right-hand and left-hand versions, particularly suitable for smaller rooms.

A free-standing bathtub made from solid surface in a gentle, comfortable shape with or without whirl system. Also as a fitted version.

The collection is complemented by new accessories of functional and symbolic value, including a shelf with integrated towel holder, made from revolutionary SaphirKeramik. Toilet roll holders and clothes hanger are also available.

The playful, slightly eccentric form of the washbasins is quite iconic and fires the imagination without compromising functionality. The wide variety of ILBAGNOALESSI One washbasins demonstrates that good design can take more than one shape. From the small washbasin to the countertop washbasins, the character of the range is unmistakable. Most washbasins have a concealed ceramic overflow system. The ceramic of the washbasins is finished with LAUFEN Clean Coat, making it particularly easy to clean.

The sanitary ware with its poetic design language was created by the prolific Italian designer, Stefano Giovannoni. ILBAGNOALESSI One includes not only the characteristic and spectacular washbasins, but also an aesthetically-pleasing high-quality and functional range of furniture, bathtubs made of solid surface and sanitary acrylic as well as accessories made from SaphirKeramik.

An icon of contemporary design: the floor-mounted TamTam by LAUFEN opens up new dimensions in bathroom design. The taps, mounted on the rim of the basin, wall-mounted or floor-standing, combine perfectly with the washbasin. Behind this lies an exceptionally high degree of functionality: invisible overflow, concealed connection hoses, hidden mounting.

The surfaces are top-quality Noce Canaletto real wood veneer or white high-gloss lacquer with a quartz cover plate. It goes without saying of course that all surface finishes are not sensitive to water.

IL BAGNO **ALESSI** dOt

ILBAGNOALESSI dOt – a cooperation between Alessi, LAUFEN Bathrooms and Oras – is the first bathroom project of the designer, Wiel Arets.

In drawing up the design, Arets paid particular attention to ensuring that the individual objects did not distract from the real purpose of the bathroom – to cleanse the body and spirit.

Wiel Arets: “The ensemble as a whole is based on the strengths of its individual parts. Each must fulfil its purpose without becoming overly dominant. All objects must, in all respects, serve the purpose of relaxation. The design of the forms is very low key yet consistent for all objects which means they project an overall impression of peace and tranquillity.

On closer inspection, it can also be seen that their form perfectly follows their function.” While the designs of the Dutch architect and designer Wiel Arets are undoubtedly based on intellectual concepts, they are also pragmatic.

His most significant work includes the Academy of Art and Architecture in Maastricht and the AZL Pensions Fund Headquarters in Heerlen, Netherlands.

Wiel Arets was born in 1955 in Heerlen and received his diploma from the Technical University of Eindhoven in 1983. In 1984, he founded the office Wiel Arets Architect & Associates in Heerlen, which subsequently moved to Maastricht in 1996. He has lectured all over the world at academies and universities in London, Vienna and New York and other cities. He currently holds the Berlage professorship at the Technical University of Delft.

Formal and minimalistic: this is the impression created by the elements of ILBAGNOALESSI dOt. The unifying key element is the circle – even if this is not always obvious. The highly minimalist design with closed form and low-key elegance radiates an air of tranquillity.

PALOMBA COLLECTION

With the introduction of the successful LAUFEN PALOMBA COLLECTION in 2005 the famous Italian designers Ludovica and Roberto Palomba created a design language that the couple describe as a “fingerprint of nature”. The tension between rigorous geometrical and organic shapes is typical of the entire collection, and ensures that all elements can be combined with one another. If recent editions have favoured geometrical shapes, this time round the Milanese designers are again focusing more on soft organic lines. The highlights of the PALOMBA COLLECTION are the “Menhir” washbasin and an exceptional bathtub. These two leading protagonists are accompanied by a cast of four countertop washbasins, two washbasin bowls and a new bathroom furniture collection.

DESIGN PLUS

LAUFEN extends its range of washbasins introduced in previous editions of the collection by four countertop washbasins in 50, 65, 80 and 100 cm lengths. An organically shaped bowl blends lagoon-like into the ultra-flat washbasin panel. The central position of the bowl leaves ample storage space at either side.

To match the ceramic washbasin LAUFEN has created a bathroom furniture series for the PALOMBA COLLECTION. It includes vanity units whose handles and bases can be optionally selected with atmospheric LED lighting, a tall cabinet, medium cabinet and washtops

The PALOMBA COLLECTION offers endless creative possibilities, as many of the objects can be combined with each other. LAUFEN has set itself the task of continuously adding new design solutions to the PALOMBA COLLECTION. The versatile design tonalities give architects, interior decorators and designers a wide selection of superior quality, up-to-date products at their disposal in the planning of bathrooms, thus offering them a great opportunity: To break free from all clichés and have full design freedom.

Innovative axialities: organic decisive lines for a large washbasin that characterize and shape the entire range of architectural objects. A unique product in the world of sanitary wares which poses a real challenge to the laws of production. This iconic 1600 mm washbasin is also available in widths of 1200 mm and 800 mm. Together with the asymmetric washbasin bowl, this washbasin won the coveted red dot design award.

The bathroom is also architecture. This room can become a real part of the home by devising bathtub, washbasin, WC, bidet and furniture configurations. The WC and bidet in white ceramic are available as a floorstanding bidet/WC, wall-hung bidet/WC and WC with cistern. The toilet seat has a lowering system. The WC seat with ultra-flat cover fits existing stylish WC versions.

Symmetrical and asymmetrical bathtubs made of acrylic and Sentec mineral material. The PALOMBA COLLECTION takes pure geometry to a new level. A modern international bathroom, thanks to essential shapes that are unique, sensual and readily combinable. These innovative and unprecedented creations mark the start of a new chapter in the art of bathroom design. Symmetrical tubs are available as a free-standing version or fitted version. The large, asymmetrical tub is available as a fitted version, with an extremely flat, 20 mm rim and with an 80 mm rim. Its shape and its generous dimensions reminds one of a small lake, in which one takes a dip to relax and replenish energy.

Kartell by **LAUFEN**

◆ SaphirKeramik

Since its launch Kartell by LAUFEN has celebrated great successes with clients, at design events, award ceremonies and trade shows around the globe. Now, with an exciting range of new products, LAUFEN is opening another chapter in this success story. New to the range is a 120 cm wide washbasin made from SaphirKeramik. This generously sized piece is perfect for larger washing areas. Also new is a 90 cm washbasin with a shelf on the right, an extremely compact guest basin with storage on the right or left. This range is made from SaphirKeramik and includes innovative features such as a special hidden outlet and optional invisible overflow.

**ELLE
DECO**
INTERNATIONAL
DESIGN AWARDS

To this collection we have also added an easy to clean rimless toilet and space saving vanity units for guest bathroom washbasins. Also new are the vanity units with one or two drawers for 90cm and 120cm washbasins. With its new products Kartell by LAUFEN furthers its reputation as a complete bathroom collection, offering innovative and stylish options for exceptional bathrooms, both compact and generously sized.

The new line of fittings in the Kartell by LAUFEN range combines quality design and pure lifestyle in one. LAUFEN has now expanded its range with elegant fittings and single lever operation. To select from is a washbasin faucet, a column faucet for countertop bowls as well as a bidet faucet and a new 2-hole faucet with swivel spout and indi-

vidually positionable operation. LAUFEN complements the Kartell by LAUFEN fittings range with wall-mounted faucets for washbasins, bathtubs and showers. They provide the user with a convenient storage space for personal accessories and can be installed quickly and easily thanks to the innovative flush-mounted Simibox 1 point unit.

LIVING CITY

A system with corners and edges, yet so flexible and easy to maintain: living city has a clear concept and clear forms. Thanks to the modular system, washbasins with and without storage are available in many widths. Reduction, not stone cold sobriety; individualism without idiosyncrasy: The language of the living city forms is aimed at people who live in modern surroundings and create a living environment with refined awareness and sensitivity to materials. The design of LAUFEN rectangular wall-hung WCs and bidets suits this context perfectly.

Urbane and modern: living city demonstrates a bold tendency towards reduction and interprets sanitary ware as a cube. This bathroom design is characterised by a clear line and aesthetic sophistication.

Pure geometry: The sanitary ware products of living city speak a clear formal language are a celebration of modern lines – and are also eyecatching in combination with the matching city line, citypro and cityprime faucets.

Case, the bathroom furniture series, is the perfect compliment and provides more storage space for all living city washbasins (see chapter “case”).

LIVING SQUARE

living square pushes the art of ceramic manufacturing to its limits. The extremely flat washbasin, with its flat surfaces and defined edges, appears to float in front of the wall. This is how elegant sanitary ware can be. living square inspires with its slender outline: The double washbasin, with a useful width of 180 cm in combination with the ceramic shelf, creates a fully functional washing facility. The case range of furniture is equally well matched (for more information see the chapter “case”).

Design Award

SPECIAL
MENTION 2013

Different configurations are possible for the living square washbasin: traditional wall mounting; incorporated in a furniture unit; as a back-to-wall washbasin bowl; recessed into the top of a countertop or with additional practical towel holder.

The living square washbasins are cutable and can be trimmed to almost any requirement: on the right, left or at both ends. Thanks to precision engineering, they can be cut in our factory to within a millimetre of customer specifications. This means we can produce tailor-made solutions that fit perfectly into niches and corners.

living square inspires with its slender outline: The double washbasin, with a useful width of 180 cm in combination with the ceramic splash back, creates a fully functional washing facility.

LIVING SAPHIRKERAMIK

◆ SaphirKeramik

Design: platinumdesign,
Andreas Dimitriadis

LAUFEN really makes the most of the advantages of the SaphirKeramik material: New possibilities and flexibility regarding the modelling of ceramic can now be seen clearly in the delicate, thin-walled shapes and narrow radii of the living square bowls. To complement the revolutionary living square bowls, LAUFEN offers simple yet elegant furniture which shows off the delicate bowls in the right light. The floor-standing furniture units are connected to the wall and available in two sizes to suit all of the washbasin bowls.

LB³

Perfect combination with contemporary furnishings: Lb3 classic is the formal language of the middle-class living environments of the 19th century – adapted to the present day and uncapricious. The double contour lends the washbasin a timelessly elegant and light appearance. As washbasin with pedestal or siphon cover, as cutable countertop washbasin or as built-in washbasin – Lb3 classic offers a wide selection that gives you ultimate flexibility when choosing your fixtures and fittings. This range offers a nod to the past – yet is still highly contemporary in terms of its design: furniture in white, oak or wenge. For wall-mounting or flexible installation on chrome-plated metal feet. Tall cabinets with glass shelves can store a great deal ensure the bathroom stays tidy. Perfection down to the last detail: The accessories are perfectly matched to the design of the three Lb3 versions and have sophisticated chrome fittings.

reddot design award
winner 2010

LB³ COMFORT

Lb3 Comfort WCs – for greater comfort: The seat position is 6 cm higher which makes it considerably easier to sit down, allows a more ergonomic sitting position and lets you stand up more easily. It fits existing connections, which makes replacement clean and easy.

- seating position raised by 6 cm for more comfort
- knee angle of about 90° for ergonomic sitting position and ease of sitting and standing
- easy installation due to standard fixing dimensions (e.g. for renovation)

universal design award 2011

universal design consumer favorite 2011

Standard
42 cm

Comfort
48 cm

Whether floorstanding or wall-hung, whether with face mounted or recessed cistern: the Lb3 WC and bidet range is convincing due to its variety – with or without lowering system. In the classic variant, the double contour is applied to the WC lid, and is kept simple in the modern and design versions. The WC and bidet sanitary ware range is the same for all Lb3 versions. Many convincing practical details: bidet overflow without overflow hole and concealed fixings for WC and bidet.

INO

◆ SaphirKeramik

A fine feeling for the trends and developments in business and the environment characterise the design of Toan Nguyen: With his design studio, the Toan Nguyen Studio, he designs products that lend the spirit of the times a timeless shape. Toan Nguyen was born in Paris in 1969 and graduated in 1995 as an industrial designer from ENSI-Les Ateliers in Paris. Nguyen gained experience by working at various design offices in Paris, Barcelona and Madrid, before starting a 10-year collaboration as a design director and design partner with Antonio Citterio in 1998. During this period, he came up with designs for brands like Axor Hansgrohe, B&B Italia, Flos, Fusital, Guzzini, Iittala, Kartell, Metalco, Skantherm, Technogym and Vitra. Toan Nguyen established his own design studio in Milan in 2008.

WEIGHTLESS AESTHETIC

The new bathroom collection Ino, designed for LAUFEN by French designer Toan Nguyen, understands itself as a fresh interpretation of classic washbasin forms. The innovative collection skilfully uses the creative possibilities of LAUFEN's SaphirKeramik. Elegant, inviting and almost weightless objects, the pieces work with simple lines, creating soft yet extremely stable walls. The collection includes a wall-mounted washbasin, a countertop or half inserted washbasin bowl, as well as high-quality bathroom furniture and two bathtubs.

One of the collection's stand out features is its sensational washbasin with seamlessly integrated console. The easy-to-clean shelf, which defines the space next to the generous washbasin has a drawn up back wall, and can be located on the left or right of the washbasin. In 2015 this piece was awarded the coveted Design Plus Award by the ISH jury.

A free-standing bathtub made from Sentec is available in 1700x750 mm and 1800x800 mm forms, including an integrated headrest and creates a relaxing atmosphere. With its narrow edges the oval tub looks as delicate as the washbasins made from SaphirKeramik. The piece, distinguished by its light weight, is made with a single layer cast from a single mould.

Ino also includes wall-mounted washbasins in 450 and 560 mm widths and washbasin bowls in widths of 350 and 500 mm, which are available as countertop or as half-inserted versions.

Nguyen has also designed a set of bathroom furniture that visually and functionally accompanies his Ino collection. A highlight is the ultra-thin panel on the drawer made from real wood veneer or mirrored aluminium, which seamlessly flows over the sides and base of the cabinet making it appear as one piece. A matching cupboard with a corner door is also available.

VAL

◆ SaphirKeramik

Munich designer Konstantin Grcic is not only one of the most influential designers of his time, he is also renowned for his ability to stretch new materials and production methods to their limits. With the new SaphirKeramik range, we offered Grcic the opportunity to redefine and push the creative boundaries of bathroom ceramics. The intensive collaboration started with the SaphirKeramik project and focussed on a series of spectacular concept studies based on washbasins with a decorative, functional surface.

FUNCTION AS ORNAMENT

The extraordinary design potential of LAUFEN's revolutionary SaphirKeramik reveals itself in the new bathroom collection Val, designed for the Swiss bathroom specialist by star designer Konstantin Grcic from Munich. Simple architectural lines, extremely narrow edges and fine surface structures make the washbasins of this collection globally unique. The Val range includes washbasins, washbasin bowls, trays, bathtubs and new bathroom furniture from the Space collection.

The rectangular, wall-mounted washbasin, is available in 6 widths from 450 to 950 mm. Its trademark, straight geometric lines and walls with small radii and gently rounded corners emphasise the humane and friendly character of the delicate SaphirKeramik.

Suited to the SaphirKeramik objects, Konstantin Grcic has designed a compact, free-standing bathtub in the dimensions 1600x750x520 mm. The oval tub weaves a sense of harmony into the bathroom with its lightness and elegance, created by its extremely narrow edges, and fits perfectly with fine washbasins. As LAUFEN manufactures the bathtub from the solid surface material Sentec, it can be crafted as a single layer in one mould without sacrificing integrated overflow, while also reducing the bathtub's weight.

Val also includes a rectangular and an asymmetrical washbasin bowl as well as a partially concealed washbasin, each of which is equipped with built-in storage space and has a tactile surface texture that creates semi-dry areas. Also belonging to Val are circular and rectangular storage trays made of SaphirKeramik, both of which have tactile surface structures. All washbasins are available with or without overflow.

PALACE

A timeless classic, conceived with the future in mind: palace has developed into a complete multi-faceted bathroom solution. But its speciality remains: To provide cutable washbasins tailored to the measurements of any bathroom.

Palace's designer, Andreas Dimitriadis of platinumdesign, has put together a bathroom range that is as suitable for the private home as it is for the hotel bathrooms of the world. It is a homage to the ceramic material, taking advantage of its strengths in both applications.

The large palace washbasins (from a length of 120 cm) can be ordered made-to-measure from our factory. Thanks to our innovative production engineering, our sanitary ware fits precisely into bathroom plans. The sanitary ware can be cut, also diagonally. Freestanding side components can also be manufactured to precise measurements without having to add on side panels with visible joints.

Whether wall-mounted or floor-standing – the range of palace WC and bidet models covers all applications. Ingenious: An ergonomic form, also as wall-hung WC compact, with concealed mountings. An optional WC seat with lowering system is also available.

LAUFEN PRO

LAUFEN has extended its successful LAUFEN pro bathroom range, and updated its design. It has enhanced this already comprehensive bathroom range, which offers the ideal solution for every spatial situation and requirement and also reflects the building values of the current generation. Industrial design is the modern answer to the once revolutionary idea that everyone has a right to enjoy beautiful forms. Good design is now no longer a right reserved for the most affluent customers. Modern methods of industrial production and designers such as Peter Wirz of Vetica, who put optimum manufacturing feasibility at the forefront of their creative processes, make such sanitary ware ranges as LAUFEN pro possible. This does not just benefit the designer, more importantly, it also benefits the customer.

LAUFEN PRO B

LAUFEN PRO A

LAUFEN PRO LIBERTY

LAUFEN PRO S

The Swiss designer Peter Wirz is also responsible for LAUFEN pro S. With heaps of sensitivity, he brought about a systematic, production-optimised evolution of the pro concept: Thanks to its slim silhouette and clearly-defined radii, the washbasin has a light and elegant appearance. The deep bowl means that it's also functionally appealing. The aesthetics of LAUFEN pro S therefore definitely take the range in the direction of LAUFEN's premium design lines – while remaining affordable by all.

Slimmer, lighter and bolder - LAUFEN pro S is the new family member that supplements the successful LAUFEN pro series. Thanks to the careful redesign, the elegant pro S is compatible with all pro variants.

If space is scarce, good ideas are required. LAUFEN pro compact solutions give you the opportunity to devise a comprehensive design concept, even in the most restricted spaces. Our washbasins and WCs have a short projection which saves valuable space.

The new LAUFEN pro S WC is a geometric wall-hung WC which comes with a matching bidet. It fits in perfectly with the redesign of the LAUFEN pro S washbasins. Thanks to the concealed LAUFEN EasyFit mounting system (PCT pat. pend.), the ceramics have a flawless appearance and are easy to clean.

The bowl of the new LAUFEN pro S rimless WC has no rim. Dirt and adhesions no longer find a foothold and are cleanly washed away thanks to an innovative, powerful flushing system.

The elegant and subtle LAUFEN pro S furniture-mounted washbasins with deep, highly functional bowls and generously sized shelves are new to the range. These are only available together with the matching furniture in the range.

LAUFEN PRO B

Elegance and function combined. Semicircular washbasins in a large number of sizes. Suitable for any type of use. Pro as in professional – B for Basic.

The elegant shape is striking, as well as the raised rim in the LAUFEN pro B series. This is a washbasin which makes a good impression everywhere. It is thus logical that it is available in a large range of sizes and styles.

The bowl of the new LAUFEN rimless WC does not need a rim. Dirt and adhesions no longer find a foothold and are cleanly washed away thanks to an innovative, powerful flushing system. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene this system offers. LAUFEN has further developed a revolutionary wall fixation system for WCs, bidets and urinals. A patent has been lodged. The invisible and easy to mount EasyFit fixation system meets the needs of both fitters and end users.

- Hygienic
- Easy to clean
- Powerful flushing
- Economical
- Flexible
- Great design
- EasyFit system PCT patent pending
- Optimally supplemented by LCC

BATHTUBS

Clean cut, traditional forms have a special appeal: and this is the case too with LAUFEN pro. Based on rectangular geometric forms, the design brings maximum functionality and a clean cut appearance to the bathroom. The acrylic bathtubs in the LAUFEN pro range are available in white or pergamon, in five sizes and also with whirl system.

WASHBASIN BOWLS

The original washbasin. What was once effectively a portable water container now provides elegant highlights in the bathroom. The washbasin bowl embodies a timeless chapter in bathroom history. More and more designers are now combining the light appearance of the washbasin bowl with suitable vanity units, which restores a great deal of authenticity to the bathroom.

WASHBASINS, UNDERSURFACE GROUND

The ground flat underside of the wall-mounted washbasins shown here is placed on the furniture. When ceramic bowls are combined with stone, wood or metal bases, this opens up a wide range of interior design possibilities.

SEMI-RECESSED WASHBASINS

The recessed washbasins project out from a slender, space-saving countertop. In hotel bathrooms, and wherever space is limited, semi-recessed washbasins are an elegant solution that allow greater freedom of movement.

DROP-IN WASHBASINS

The ceramic basin is lowered from above into the cut-out in the washtop. In contrast to washbasin bowls, the underside is not ground flat, as the washbasin is not supported at the bottom. Bathrooms can be designed to individual requirements using a combination of washtops and bowls with a wide variety of forms and colours.

With their geometric and pared-down, harmonious forms, talux washbasins are a refreshing move away from short-lived fashionable trends. Flat ceramic surfaces contrast harmoniously with the curves of the basins themselves. This is timeless elegance that is part and parcel of a modern lifestyle. Durability and functionality, efficient maintenance and an excellent price-performance ratio also make talux the first choice for the municipal sector.

FLORAKIDS

Design: platinumdesign, Andreas Dimitriadis

Made with love!

Children love animals, and the more imaginative, colourful and friendly the better. We have succeeded in creating a child-friendly environment for early childhood hygiene. With its rounded shapes and strong colours, and taking inspiration from real life plants and animals, our bathroom reflects the typical playful and imaginative world of pre-school children. This product family is practical and adapted precisely to the needs of children.

design
award

2011 ■

Strong individual design with a kick: For Andreas Dimitriadis, a perfect product is one that does not just fulfil the expectations of the customers, but one that surprises them with its unexpected positive aspects as they use it. It is guided by the philosophy of the proprietor of the platinumdesign studio, together with his team of designers, CAD specialists and modellers, to develop strong individual designs that offer customers added value, that appeal to them emotionally and reflect the quality of the product visually, thus building up a strong brand trust.

Andreas Dimitriadis: "With florakids, LAUFEN has succeeded in creating a positive, lively and child-friendly environment for early childhood hygiene. This bathroom has been created exclusively for children!"

The florakids positive and playful washbasin is designed entirely with the needs of children in mind. Owing to its size, children can reach the faucets effortlessly. It can be used from all sides by more than one child at a time and its generous shelf surface leaves plenty of room for paintbrushes, beakers and toothpaste. Its round, corner-free forms also help prevent injuries. The washbasin is available in white, red and green. The colours have been fired on and are scratch-resistant, hard-wearing and non-toxic. The rounded form of the curvepro faucets not only lends a playful touch, the powder-coated lever grip in red or green is easy for children to grip and use. The corresponding single-lever mixer with cartridge and fixed limitations allows, if defined and set by the customer, a lower water consumption and ensures scalding risk.

LAUFEN PRO LIBERTY / MODERNA R

The barrier-free bathrooms transform comfort and practicality into good design and make an important contribution to independent living. LAUFEN pro liberty is a useful solution for hospitals, nursing homes and senior citizens' residences, as well as for private homes. Its simplified lines make it a perfect match for the comprehensive range of LAUFEN pro baths and make standard-compliant use of the bathroom a much more comfortable experience. LAUFEN pro liberty conforms to DIN 18040 and SIA 521 500. The washbasin impressed the jury and customers at the Universal Design Awards 2011 and the Customer Favorites 2011.

LIBERTY LINE/REHAB

Barrier-free according to DIN standards and ÖNORM (Austrian Standards Institute). The 18024 and 18025 standards define the pre-conditions that bathrooms and toilets must fulfil in order to receive the "DIN barrier-free" certificate. The liberty line range has been awarded the "DIN barrier-free" standard and includes a wheelchair-compatible washbasin without

overflow hole and with a concealed siphon. The WC, which must be at least 5 cm higher, has a projection of 70 cm and can be mounted as a wall-hung WC using existing connections. rehab is another wheelchair-compatible washbasin made by LAUFEN which is available without overflow hole.

HIJET WC

HIJET WC

HiJet is a new type of WC having highest-performance flushes with volumes of 4.5 and 6 litres. This unique model unites all worldwide standards. Maximum performance tests have shown that this powerful WC is prepared to meet future standards. It does already achieve outstanding flushing results with 2–3 litres, if the downstream drainage systems are designed for this purpose. LAUFEN has lodged a patent for this new flushing system.

UNIVERSAL CISTERN

Elegant interface for WC

The floor-mounted LAUFEN Universal cistern is characterised by its rectangular geometric design and its high functionality. Its simple cuboid shape can be unobtrusively integrated into the spatial geometry of the bathroom, elegantly disguising the sanitary technology for the WC – the water connection, cistern and outlet are all fully hidden inside the ceramic housing. The minimalist design fully harmonises with the wide range of floor-mounted WCs offered by LAUFEN.

However, the Universal cistern not only has optical advantages. As an interface between the WC and the water supply and drainage installations, it also contains all standard connection options. It is thus eminently suitable for new constructions, renovation projects and bathroom conversions. Under normal circumstances, installation will not require any structural changes or interventions.

When installed by an expert, the WC will be back in operation within the shortest possible time – a customer-friendly solution when the conversion has to take place under normal operating

circumstances; a real alternative to conventional surface-mounted or concealed solutions.

When it comes to cleanliness and hygiene, the robust ceramic housing of the Universal cistern has many bathroom advantages.

The ceramic surface has no joints or recesses where dirt can collect. A moist cleaning cloth is usually sufficient for quick and easy cleaning of the smooth surface.

The LAUFEN Universal cistern is available with the dimensions 14x40x98 cm (DxWxH). The cistern and internal flushing mechanism make use of durable, water-saving Geberit technology. The flush mechanism is triggered by a two-volume flush button, which can be set to release water volumes of 6/3 litres or 4.5/3 litres. The Universal cistern fulfils the required standards for the USA (ASME A112.19.2 and A112.19.14), Australia (AS1172.2), Europe (EN14055 Class 1/Class 2) and Switzerland (592014-1).

LIS LAUFEN INSTALLATION SYSTEM WCS AND URINALS

NEW WALL INSTALLATION SYSTEM AND ACTUATOR PLATES FROM LAUFEN

The LAUFEN installation system LIS is the perfect solution for safely, quickly and easily installing LAUFEN's wall-hung toilets and urinals. The range includes various concealed elements for dry and wet construction, and makes a wide variety of different installation scenarios realisable. All wall mounted units are equipped with a toilet tank that has a water-saving dual flush system, meaning flushing options can be set to either 6/3 litres or 4.5/3 litres.

CW1

CW2

CW3

CU3

Wall-hung WCs and urinals can be mounted effectively and securely in dry-wall construction thanks to LIS. Only a minimum space width of 140 millimeter is required. In addition, a freestanding version is also available that does not require a supporting wall. A water saving cistern with dual flush is already built into the construction elements, the flush volume can be chosen from 6/3 to 4.5/3 Liter. A fixing kit as well as the connecting pipes are included in the scope of delivery, the version CW2 also comes with a connecting pipe needed for the shower toilet installation. Matching the modules, the actuator plates AW1 and AW2 Inox conclude the assortment.

TW1

TW2

LIS allows the installation of WCs with high-level cisterns on half-wall or brick wall constructions, requiring only 125 millimeter width of space. A water saving, dual flush cistern with 6/3 liter adjustable to 4.5/3 liter as well as the connecting pipe to the WC belong to the assortment. As compatible actuator plates AW1 or AW2 Inox can be chosen.

.007 chrome matt

.000 white

AW2

Stainless steel

With LIS LAUFEN provides a reliable construction system for dry-wall and brick-wall installation. Matching actuator plates in the best design tradition of LAUFEN are also available. All of them are designed for water-saving dual flush. The variant AW1 can be chosen with different surfaces, whereas the variant AW2 consists of extremely durable stainless steel and is therefore particularly suitable for public and semi-public sanitary rooms.

SPECIAL ARTICLES

The sanitary ware used in public buildings is subject to far more demanding requirements than its domestic counterpart. In hospitals, schools and public conveniences they need to work perfectly over long periods and thus have to fulfil very different requirements. LAUFEN calls the products it designs

to fulfil these requirements “special articles”. Particular special features, such as the clean lines they have on their upper surfaces and continuous overflow channel, give our robust sanitary ware exceptional hygiene, clear lines without nooks and crannies where germs can accumulate, and lasting quality.

PUBLIC URINALS

LAUFEN urinals for “public” sector can be seen in a wide variety of public places. Whether it be in the catering sector (restaurants, bars and hotels), busy transport nodes such as stations and airports, the business sector, municipal buildings such as schools and congress centres, or shopping centres, cinemas, theatres or concert halls – the scope of applications for these urinals, most of which are equipped with electronic flushing, is practically unlimited.

ANTERO

Eco-friendly urinal for prestigious washroom facilities: With its antero urinal designed LAUFEN offers outstanding design and meticulous well-conceived functions to create prestigious washroom facilities for guests, customers and staff. This masterly combination in the product design of the two qualities, form and function, the urinal has already earned the Red Dot Award 2012. The outstanding design has been developed by Toan Nguyen.

reddot design award
winner 2012

German
Design Award
SPECIAL
MENTION 2014

LAUFEN urinals are set to revolutionise the upkeep and maintenance of public sanitary facilities. Up till now, urinals often had to be completely disassembled when replacing their siphons. antero and lema allow you to release the siphon easily using a special key and lift it out.

The siphon on antero und lema urinals can be changed easily, quickly and economically:

1. Remove ceramic cover by hand.
2. Lift siphon up and out using special key.
3. Clean urinal and rinse pipes.
4. Insert the new siphon.
5. Place ceramic cover.

ANTERO & LEMA CONTROL SYSTEM

antero and lema urinals offer everything required by operators of public toilets: A thorough and water-saving flush, easy cleaning and maintenance and demand-oriented control electronics.

The intelligent control system has different modes and can trigger cleaning after each user or at defined intervals with different flush quantities of between 0.5 and 3 litres. Following long periods of non-use, a hygiene flush takes place every 24 hours by default. An integrated overflow protection provides additional safety in the event of the outlet being clogged.

Stadium mode

If usage frequency is high, the system automatically switches to stadium mode, which causes flushing to take place independently of usage. The system then triggers a flush at a programmable interval. If the system detects no usage within a flushing interval, it automatically switches back to normal mode.

Hybrid mode

The urinal flushes at a predefined interval if usage is detected, and not after every single use. The flushing interval can be set to six different values between 1 h and 12 h. A predefined flushing volume is assigned to each flushing interval.

Bluetooth mode

Bluetooth and a free smartphone app can be used to set the urinal from a mobile phone, monitor statistics and to check its function.

NEW

USB module

In addition to user-friendly operation via a control panel, settings can be changed conveniently on a laptop using a USB connection. The clear interface of the control software also allows status functions and statistics to be queried.

➔ **Informations on LIS**
Laufen Installation System for Urinals are to be found in the chapter with the same name

GLT module

With the help of an additional module, the LAUFEN control system has an interface to popular building control systems. This allows central flushing to be triggered and stopped, the flush quantity to be changed, and status queries to be made.

Lema, waterless urinal

The innovative Lema 0-litre urinal operates without water and does not require a water shut-off device or electricity to keep the drain closed. The urine itself helps to keep gases sealed in and to prevent their escape. The principle behind this "trap" is known in the chemical industry as the Erlenmeyer flask.

HOME URINALS

The requirements are by no means the same for all applications which is why LAUFEN urinals are available for public and private uses. While urinals for the “public” area are designed to satisfy high installation and functional standards, urinals for the “home” area are impressive due to their high aesthetic standard. Urinals in the “home” area are ideal for private use. Their harmonious form gives your bathroom a very special atmosphere.

BATHROOM FURNITURE

It's hard to believe that we spend a large proportion of our lives in the bathroom. And for precisely this reason the bathroom, a place where we retreat to relax and take some time out of the daily grind to recharge our batteries, needs to have a special atmosphere. The harmonious bathroom furniture meets the highest aesthetic and functional standards – which means you savour those valuable moments in the bathroom all the more intensely.

CASE

Compact, functional design is the main success factor in both collections. Case can be combined with many LAUFEN sanitary ware ranges. The rigorous straightforward forms bring out the best in any sanitary ware.

Timeless yet contemporary – case fits in almost any environment. The white scratch-resistant surfaces or contemporary wood structure surfaces of this continuously updated classic make it a compelling choice.

The case furniture range features a high-quality storage concept, suitable for combination with the living square range, among others – and which also represents extremely good value for money. Its ability to make the bathroom neat and tidy at all times is good for both mind and body. One of many technical refinements is the space-saving siphon which dispenses with the need to make siphon cut-outs which means all the space in the vanity unit can be used without restriction.

The case vanity unit, used here in combination with palace, can hold a great deal behind its soft closing doors and in its fully extendable drawers. Optional: one or two drawers.

Special details in a cubist form: The washbasins in the living city range are particularly suitable for flush integration of the furniture.

LAUFEN offers a wide selection of colours for matt special coatings in addition to the standard decoration for the case furniture series.

If you need more storage space in your bathroom, case cabinets offer the best value for money. There are two different versions available to help you stow your bathroom utensils tidily out of sight.

The comfort features of the cabinets include surface-mounted handles and glass shelving.

Their exceptionally scratch, water and UV-resistant, easy-to-clean surfaces are available in three colours; white, chalked oak and anthracite oak – on request, we can deliver 38 other painted surface colours.

Wall mounting is simple and easy thanks to our flexibly adjustable 3D installation system.

CASE MIRRORS

Mirror with horizontal lighting.

Especially good illumination thanks to two vertical lamps.

The case mirror collection goes perfectly with LAUFEN furniture and washbasins. The mirrors in minimalist, timeless design are available in many different sizes and three different lighting schemes.

The mirror is backlit indirectly via the wall, giving the bathroom a relaxed atmosphere. At the front, lighting elements light up the face perfectly when applying make up or when shaving. The superb price-performance ratio of case mirrors makes them an attractive solution for both private and public projects.

CASE

Mirror with one horizontal lighting element, 230V, IP44

FRAME 25 MIRROR CABINETS

The timeless frame 25 mirror cabinet is a useful addition to a bathroom washbasin: Its continuous LED strips casts bright light, similar to daylight, on your face for applying make-up application or shaving and is a handy place to store accessories. High-quality details such as double-sided, mirrored, soft-closing doors, adjustable glass shelves and integrated sockets are all very impressive in day-to-day use. An optional accessory kit, consisting of a freely adjustable make-up mirror, a magnetic strip and storage cups for cosmetics provides even more convenience. Bottom ambient lighting is also available to cast mood lighting onto the washbasin.

NEW INSTALLATION FRAME FOR MIRROR CABINETS

LAUFEN has now developed an installation frame for the handy mirror cabinets of the Frame 25 series. It can be used to install the products flush with the surfaces in niches, front-wall installations or walls. The frame made of anodised aluminium can be easily installed and allows the attachment of the mirror cabinet at the end of the installation phase, which provides additional protection against damage. A special handle is available so that the doors of installed mirror cabinets can be conveniently opened.

SPACE

LIGHT AND SPACIOUS AT THE SAME TIME

With Space, LAUFEN presents a bathroom furniture collection that is based on the lightness of SaphirKeramik, translating it into clear, architecturally minimal forms. Typical for LAUFEN, Space knows how to convince with practical details and high-quality equipment. Space includes vanity units in widths 450-950 mm, which can be combined with washbasins from LAUFEN's Val range.

In addition, 12 mm thick washtops of up to 2000 mm in length and drawer units in widths from 450 to 800 mm are available. Several LAUFEN washbasins can be combined with these washtop solutions. The range complements a variety of high cabinets, including those with double-sided mirrors, gently closing doors, available as open versions or as narrow rack.

BOUTIQUE

THE LIGHTNESS OF THE ROOM

For weightless elegance in the bathroom LAUFEN offers its new furniture collection Boutique. Clear cubes and a sophisticated design language with tapered edges offer a perfectly shaped storage space to the bathroom, blending harmoniously with the subtle forms of SaphirKeramik washbasins. At the same time, user friendliness is not compromised. Intelligent and unobtrusive solutions such as push-and-pull drawers that gently and quietly open and close with just light finger pressure, allow a simple, even playful experience.

Boutique also includes vanity units, which can be combined with a range of washbasins from LAUFEN's premium collections, including open, combinable furniture modules and a spacious tall and medium cabinet.

WELLNESS

Bathtubs, shower trays, whirl systems

LAUFEN bathtubs and shower trays have been designed for people who see their home as a place to unwind and recover. From the classic bathtub through to models with complex whirl systems, the quality and workmanship is first class. The tubs are made of high-quality materials, from the best suppliers in the world.

Almost all LAUFEN bathroom concepts have a suitable bathtub as part of their range, which comes in many shapes and forms. LAUFEN also offers many bathtub and shower tray solutions that are not associated with any particular design concept and can therefore be easily combined with existing sanitary wares.

SOLID SURFACE BATHTUBS AND SHOWER TRAYS

Bathing in a bathtub made of solid surface material feels like being in a natural basin. Due to a high percentage of mineral particles from nature, the surface feels smooth, like a rock which has been rounded and polished over years by gentle flowing water. The pleasant, warm touch of the surface gives a feeling of healthiness and cleanliness – and caters for maximum relaxation.

The innovative material also allows for an incredible freedom of design: almost every shape is feasible – from very organic, following nature's example, to very straight and architectural. Bathtubs made of solid surface are true design objects in every kind of bathroom.

Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned – and therefore provides public buildings and private households with a long-lasting product, that is easy to maintain. Thanks to the characteristics of the material even small damages, like stains or scratches for example, can be cleaned easily or repaired invisibly. And of course, the solid surface material is non-toxic, which is essential for a material that handles water, our most valuable resource.

Tailor-made shower trays made from Marbond

LAUFEN presents a new collection of floor-level shower trays, customisable to your individual, tailored requirements. The cast, made from the solid composite Marbond is finished with a gel coat that is extremely hygienic and easy to clean. The range includes widths from 80 to 100 cm and is avail-

able in lengths from 90 to 160 cm. The cover of the elongated outlet hides a powerful syphon, which can also accommodate the large volume of water from rainshower models. In standard form the shower trays are available in white, light ivory and dark grey. For custom designs, the size is open to customer choice and colour options extend to the entire RAL range.

ACRYLIC BATHTUBS AND SHOWER TRAYS

Because of their manifold qualities, bathtubs and shower trays made of sanitary acrylic have a decade-long tradition in the bathroom. All over the world, the material is highly appreciated for being smooth and comfortable to the skin. It's always a pleasure to take a bath or a shower and feel the warm touch of the material, which has excellent insulating properties too. Since the surface is very smooth, particles of dirt cannot get a grip or can be easily rinsed off – so well-being already starts when cleaning. As contemporary bathrooms have to reflect the individuality and personality of their users, the sanitary acrylic bathtubs and shower trays from LAUFEN are available in many different shapes and sizes. They are made to fit into every bathroom scenario and ambience. Each and every one is a masterpiece of design and quality and can be equipped with panels for easier adjustment and maintenance. Thanks to the shiny surface and the slenderness of the material the bathtubs and shower trays look quite elegant – even more, when the sanitary acrylic is integrally coloured and creates a harmonious ensemble with the colours of the ceramic objects in the bathroom. The necessary stability is provided by an optional aluminium frame accompanied by reinforcements of wood below the bottom and rim and a durable fibreglass lamination.

LAUFEN SOLUTIONS

There should be no limits when it comes to feeling good which is why LAUFEN has a bath and shower range with the ideal format for any spatial situation. Sometimes every centimetre counts in the bathroom. A hexagonal tub or shower tray which fits cleverly in the corner, for example, frees up more space. This is why a wide range of shapes and sizes of shower tray are required in order to find an especially good solution for a particular spatial situation. LAUFEN solutions is a high-quality set of tubs and trays. Our tubs and trays are made of the highest quality sanitary acrylic and have been carefully polished and quality-tested. LAUFEN solutions bathtubs also come with a variety of whirl systems.

WHIRL SYSTEMS

Wellness at home: LAUFEN combines the rejuvenating energy of water, air and underwater lighting for reviving massages in your own bathtub at home. A feast for the senses – in total privacy. Underwater massage combines the life-giving power of water and air to lift your feeling of wellbeing. This is what LAUFEN promises to deliver with its top-quality bathtubs. LAUFEN whirl systems are available for all acrylic and solid surface bathtubs.

The unique LAUFEN air massage system, which features up to 90 air nozzles in the base of your bathtub, is exceptionally effective and comfortable. Thanks to the large number of apertures, the entire body is massaged evenly with ozone treated warm air which enters the water through air conduits under the floor of the tub. There are no metal nozzles which project beyond the base of the tub. The intensity of the air massage can be controlled seamlessly up to 100%. The air massage system is self-drying and therefore extremely hygienic and easy to maintain.

Unlike the air massage system, the water massage system uses water jets to achieve the desired massage effects. Depending on the model, your bath may feature between 10 and 14 massage water nozzles. There are water nozzles at the sides of the bathtub. To adjust the direction simply move the nozzle manually. Generally, it is not recommended to direct the nozzles perpendicular to the body but rather at a slight angle. The intensity of the water massage can be adjusted via the electronic control.

To increase or decrease the diameter of the water jet simply turn the inner part of the jet clockwise or anti-clockwise.

Rotary micronozzles are installed in the back and foot areas of the bathtub and can be varied manually in intensity by turning the inner part of the nozzles. For more comfort these very flat nozzles pamper you with a relaxing feeling and soft massage.

WHIRL SYSTEMS

Coloured lighting appeals to all senses. LAUFEN offers two different types of lighting: either underwater LED lamps illuminate the water or a LED strip in the overflow slot (used in Kartell by LAUFEN bathtubs) creates a relaxing atmosphere. Usually the colours of the LED lights change continuously, but one colour can also be selected via the sensor control system or remote control. The premium whirl systems (.695 .056 .057) feature a highly effective automatic disinfection system. In addition, they are equipped with a water heating system, which keeps your bath water temperature constant while the water massage function is in operation. This function is especially convenient, particularly for keeping the water warmer for longer in larger bathtubs.

Electronic sensor control

	Air massage	Hydromassage	Disinfection	Heating	LED lamps	LED strips in overflow slot	Mist	Display	Music
Option 605	x								
Option 615					x				
Option 616						x			
Option 625	x				x				
Option 627						x	x		
Option 695	x	x			x				

The touch sensors for the whirl control system are recessed flush into the rim of the bathtub so they do not detract from the aesthetic appearance of the bathtub. This is not just simple and ingenious, it also enhances safety. Besides it is scratch-resistant, hygienic as well as easy to clean. Simply control your whirl system by softly touching the illuminated symbols on the rim of the bathtub.

Remote control

	Air massage	Hydromassage	Disinfection	Heating	LED lamps	LED strips in overflow slot	Mist	Display	Music
Option 056	x	x	x	x	x			x	x
Option 057	x	x	x	x	x		x	x	x

With the remote control system, LAUFEN ensures additional comfort in its top-of-the-range bathtubs. The waterproof casing of a media player has a sophisticated design and conceals state-of-the-art technology: As well as the whirl system control, the equipment also includes an MP3 player, a radio and an amplifier which is integrated into the tub.

The straightforward user guidance with control buttons and screen gives the user full access to all functions of the whirl system who can, for example, run predefined relaxation programs which combine wellness applications and music, and also create customised programs.

The remote controlled music functions can both be seen and heard: The integrated MP3 player has 2 GB of memory for

favourite tracks, which can be played via headphones or a powerful 4.1 sound system with four 30 watt loudspeakers and a 100 watt subwoofer.

Music can also be played by external devices either wirelessly via a Bluetooth 2.0 connection or via USB cable. A practical function when relaxing in the bath: A quick-selection button provides instant access to your music collection or radio.

There is also a new function that controls a chrome-plated, LED-lit outlet, which spreads a mist over the surface of the water.

The remote control can swim on the surface of the water and is kept on the rim of the bathtub, where hidden magnets hold it firmly in place.

When ordering whirl systems, LAUFEN always recommends to order bathtubs with acrylic panels or to install removable tiled drywalls for easier access in case of maintenance. If you can't avoid bricking in the bathtub, please plan large inspection chambers of minimum size 50x50 cm so that technical parts remain accessible. The installation of an additional ventilation grill is compulsory.

STEEL BATHTUBS AND SHOWER TRAYS

There are few things in life that will last a lifetime. Bathtubs and shower trays of LAUFEN are produced using heavy 3 and 3.5 millimetres enamelled steel, which is extremely durable and dimensionally stable, as well as resistant to scratching, impacts and abrasion. As steel is a good conductor of heat, you will immediately have a warm, pleasant feeling, when your skin touches the surface.

Shower trays and bathtubs made of enamelled steel are very easy to clean – the non-porous surface gives dirt and bacteria less chance to adhere. In addition, the smooth glass finish that covers the steel is resistant to acidic cleaning agents. That's hygiene made easy!

To give a free hand for planning, the bathtubs and shower trays are available in many different heights and sizes. In addition, LAUFEN paid special attention that the available colours match perfectly with the colours of the ceramics in your bathroom – because relaxation starts with the visual impression.

For maximum convenience, several shower trays can be installed floor even to avoid stumbling hazards and both the bathtubs and shower trays are equipped with an anti-slip coating. Furthermore there is a bunch of accessories like handles or gel pillows to increase your comfort while taking a bath or a shower – and an optional structural sound insulation system that ensures that you are not disturbed in doing so.

CERAMIC SHOWER TRAYS

There are many good reasons to choose a shower tray made of sanitary ceramics: They are characterized by their long life and tangible quality. They are very hygienic and resistant against fungi and bacteria due to their glazing. And the material they are made of is 100 percent natural and completely recyclable.

The ceramic shower trays of LAUFEN are available in square, rectangular and corner versions and in different sizes. They fit harmoniously into your bathroom and give it a quite natural and human touch. Each and every one is a masterpiece of its own, thanks to the immense know-how and intense passion that are handed down from generation to generation at LAUFEN.

Our attractive shower trays offer a conveniently low step-in height and can be supplied with an anti-slip coating, if desired. The anti-slip coating has been tested according to the German industrial standard DIN 51097 and offers a higher than average anti-slip performance. Because it is applied prior to glazing and firing, it integrates durably into the ceramic structure. This refined surface offers a perfectly secure grip and is easy to clean, resistant to acids and scratch-resistant.

LAUFEN FAUCETS

LAUFEN stands for Quality & Design.
The company provides complete solutions for
bathrooms right around the world.

EXPERTISE IN FAUCETS - SINCE 1854

Very aware of the power and significance of water as an element, LAUFEN is committed to true aesthetic beauty: We give water a shape to enable it to pamper body and soul. In 2007, ROCA acquired the oldest fittings factory in Switzerland - Similor AG – and since then has been a subsidiary of LAUFEN. This has enabled the company to complete its product range as a complete bathroom provider. For the last 160 years, the employees have drawn their inspiration from the element of water, and their endless stream of innovations turn bathroom fittings into an artwork form.

FROM HOT IDEAS TO COOL FAUCETS

What takes place during the concept and planning phases, and what often heats heads to steaming point, gains its ultimate expression at temperatures approaching 1000 degrees Celsius. Production is now in progress, launching the history of a new faucet. Beholding beauty at all times, we accompany it from station to station, until it achieves its ultimate form. And at the place where ultra-modern machines reach the limits of their capabilities, that is where we encounter art once again: in the fittings finishing shop. Because pure craftsmanship is what people want.

KARTELL BY LAUFEN

Contemporary bathrooms with clear lines and sensual colours are ideal for promoting a sense of well-being. Much bathroom activity centres around the plumbing fittings, so a lot is expected of them in terms of modern design, functionality, and hygiene. The sophisticated design collection Kartell by Laufen Disc uses the round surface of the faucets as a practical storage area. The matching trays are available in four colours and can be changed according to taste and decor.

CURVEPRIME

Water for the senses: The defining characteristic of curveprime is its elegant bow-shaped outlet, a sensuous interpretation of the flow of water. This comes with a stream shaper as a single-lever mixing unit, dual-handle faucet or three-hole version.

The bathtub faucets in the curveprime range radiate perfection and dynamism. Whether you choose the version for the wall or bath rim – the ranges are comprehensive, and even have a matching handspray.

All faucets in the citypro series
(except thermostatic bath and
shower mixer) have the Ecototal
saver cartridge that saves valuable
water and energy thanks to
the restraints on volume and
temperature.

CITYPRO

Timeless expression of form for the bathroom

Fascinating design and top performance. Elegant shapes that fit snugly in the hand. The citypro faucet range reflects the spirit of the modern approach to living. Their simplicity and individuality lend an air of purism to the bathroom.

SIMIBOX Three boxes, many advantages

The concealed Simibox system combines ingenious technology and easy handling with high design standards. Choose the Simibox Standard with integrated stop valves and reversible supply and outlet pipes or one of the simpler Simibox Light versions, depending on the local conditions.

Simibox Light with stop valves

Supply and outlet pipes reversible
37898.0.000.000.1

Pre-assembled set with
functional unit and decorative
finish

Integrated stop valves

Just turn two screws and the water stops. The local stop valves facilitates any necessary service quickly and easily without having to turn off the water in the entire building.

Simple positional correction after installation by up to 5°

If the box is not installed exactly level, the functional box of the Simibox Standard can later be adjusted by 5° on both sides.

Flexible

The connections for the supply lines and mixed water outlets can easily be reversed on the Simibox Standard.

	Recess depth	With stop valves	Positional correction up to 5°	Supply and outlet connections reversible	Fits mechanical pre-assembled sets	Fits thermostatic pre-assembled sets	Pre-assembled set can later be exchanged/replaced

SIMIBOX Concealed system for all design ranges

Cutting-edge technology behind the wall means nothing without attractive packaging to round it off. The high-quality design of our concealed mixer perfectly complements the shower and bath experience. The pre-assembled kit is made up of the functional unit, together with the corresponding decorative elements, and is available to match all our design ranges. If new forms are required, a replacement is possible in next to no time. Whether you are looking for classical elegance, futuristic boldness or everyday simplicity – LAUFEN concealed mixers have something for every taste.

CURVETRONIC

curvetronic brings a breath of fresh design to public and semi-public areas. The contactless infrared-controlled water tap upgrades any bathroom. curvetronic fulfils the highest hygiene requirements thanks to a shape that is easy to clean and to its contactless operation. It also saves up to 70% water compared to other water taps with operating levers.

The integrated, high-quality curvetronic electronics offer numerous functional options that can be adjusted to meet individual needs. The water tap can be operated either by battery or a mains connection. Simple maintenance is also ensured: The curved spout has a removable cover that provides quick and easy access to the integrated technical system without having to remove the fitting.

CURVETRONIC

Infrared controllers - flexible technology for all needs

- Intelligent concept. Contactless operation for increased hygiene and convenience.
- Has a long service life and saves energy. Vandal-proof design and efficient components ensure a long service life.
- Maximum convenience. The high-quality electronics facilitate numerous functional options.
- Simple energy supply. Mains socket or battery – energy-saving electronics make all the difference.
- Superior infra-red technology. The water flows and stops automatically, controlled by an electronic sensor.

The water flow starts as soon as your hands enter the detection area.

TWINTRONIC

The twintronic concealed solution facilitates particularly space-saving design for public washrooms. Twintronic can be installed with the Simibox Standard & Simibox Light concealed system.

Infrared controllers – flexible technology for all needs

The future of water taps: contactless, hygienic, vandal-proof and economical. Infra-red technology can save up to 70% water compared to conventional water taps and the easy-to-clean shape makes it very hygienic.

Ideal for public and semi-public installation: Low consumption and maintenance costs even during maximum use.

Ideal for hospitals, sport arenas, schools, airports, railway stations, gyms and restaurants.

CERAMIC SHELVES AND ACCESSORIES

It is not always easy to find what you want: High-quality ceramic accessories. Whether under-mirror shelves in a variety of sizes, toilet paper holders or toilet brush holders, our high-quality products bestow elegance and lend a certain majesty to your bathroom. In addition, these elegant accessories are practically indestructible and particularly easy to clean. As well as all that, practical ceramic tableaus provide easy-to-clean shelving under your washbasin.

PRODUCT FEATURES AND BENEFITS: SANITARY WARE

Sanitary ware production: Tradition and innovation

The basic ingredients for making ceramics have always been naturally occurring raw materials: Kaolinite, clay, feldspar and quartz sand form the basis for this extremely durable and hard material. The individual components of this malleable material are combined, homogenised and cleaned as part of a unique and very protracted process at LAUFEN. The resulting slurry – the pourable starting material for ceramics – is poured into pre-prepared plaster moulds or shaped using a special pouring process developed at LAUFEN.

The formability and pourability of the material allows the creation of a wide variety of sanitary ware products, but nevertheless always poses a manufacturing challenge, especially when creating objects with complex geometries. Dried and glazed blanks are then baked in a kiln at temperatures up to 1240°C. Such extreme kiln temperatures ensure the hardness and durability of our high-quality LAUFEN products.

Ceramics, through their smooth, easy-to-clean surface, fulfil the highest hygiene standards – chemical acids, strong cleaning fluids or hydrochloric compounds hardly affect the material. Due its light fastness, versatility and pleasant appearance, ceramic is the most popular material used to manufacture high-quality sanitary fittings.

Top recycling qualities: Ceramic is the oldest malleable material used by mankind – and consists exclusively of naturally occurring raw materials. Ceramic is 100% recyclable and can be reintroduced into production processes as a ground powder or reused as a valuable raw material in other industries.

Ceramics or synthetic materials: Ceramic is the material which has been traditionally used in the bathroom over the centuries – and with good reason. The superiority of the material is evident, particularly in terms of hygiene, useful lifetime, environmental compatibility and durability. However, washbasins made of plastics and mineral-based cast materials are also available on the market, which present a design challenge to producers of sanitary ware. LAUFEN has always had a reputation as an innovator in the sanitary sector and is always striving to improve the materials and production techniques it uses. As a result of these efforts, new ceramic compositions have been developed that allow smaller tolerances and even more precise corner radii or large flat ceramic items. Made to measure washbasin solutions ensure that ceramic sanitary ware can be fitted with millimetre precision into bathroom floor plans. Ceramics therefore deliver outstanding performance in all respects.

A revolution in the formal language of ceramics:

The innovative and high-quality composition of SaphirKeramik bestows possibilities and versatility never seen before upon the base material, enabling exceptional shaping. Edge radii of 1–2 mm are thus technically feasible.

The new type of ceramic is considerably harder and has an improved bending strength. LAUFEN is thus able to produce thinner ceramic bodies, which reduces weight and the consumption of raw materials and energy. SaphirKeramik is not a replacement for any of the existing materials; instead, it broadens the range of forms of expression of the natural base material.

SaphirKeramik

PRODUCT FEATURES AND BENEFITS: SANITARY WARE

LCC stands for **Laufen Clean Coat**. This innovative ceramic surface finish is a vitreous silicate ceramic coating which is fired on top of the original glaze. LCC is an extremely hard, indeed almost indestructible indivisible part of the ceramic object to which it is applied.

The benefits of this process: With a roughness of only 4 nanometers, LCC is entirely free of pores. Thanks to this feature, lime, dirt and bacteria have practically nowhere to gain a foothold – and even if they do, they can be removed much more easily. A hydrophilic effect caused by the material ensures that dirt particles are more easily washed away on flushing. In addition, cleaning and disinfection fluids spread over the surface more easily and thus work more effectively. This is an ideal solution for the rigorous demands of everyday cleaning – for example in hotels or clinics – as LCC also means the sanitary ware is highly resistant to aggressive cleaning agents and chemicals. LCC ensures the highest standard of cleanliness and hygiene in the long-term. Even after years of use, the sanitary ware remains smooth and shiny, just as it was when it was brand new, in private bathrooms and public and semi-public areas.

The innovative glaze for durable hygiene.

Our **concealed ceramic overflow system**, the alternative to standard overflows for washbasins and bidets, has many benefits. Thanks to our overflow system which is invisible from the outside, our washbasins and bidets no longer have a visible overflow hole, which not only improves the appearance of the product, it also makes cleaning much easier. This hygienic and aesthetic innovation is very simple: water rises in a concealed internal channel in parallel with the water inside the washbasin, and overflows into the run-off when the water reaches the maximum level.

Another attractive detail of LAUFEN washbasins is the ceramic cover on the pop-up waste, which is available in a variety of glazes. These covers are available with a wide range of pop-up waste versions for many washbasins and bidets (e.g. the ILBAGNOALESSI One and the dOt, PALOMBA COLLECTION, Lb3, and others).

LAUFEN is breaking the mould when it comes to **drain design**. The new washbasins in the Kartell by LAUFEN range have no visible drainage opening. The water disappears into a narrow, hidden drain through an elegant pipe. A concealed overflow system has also been developed. A special valve allows you to choose between a solution which is always open or which can be closed off.

LAUFEN EasyFit: LAUFEN has developed a revolutionary wall fixation system for WCs, bidets and urinals. A patent has been lodged. The invisible, easy to mount fixation system meets the needs of both fitters and end users. For example, end users are impressed by a ceramic WC with a flawless surface which is really easy to clean since there's nowhere for dirt to hide. Fitters are enthusiastic about the time-saving, intuitive mounting system.

Thanks to our convenient **lowering system** many of our WC covers and seats close gently and quietly. For easier cleaning, all LAUFEN seats can be removed with a simple hand movement. LAUFEN seats have been comprehensively tested: amongst others the test includes opening and closing 50,000 times.

PRODUCT FEATURES AND BENEFITS: SANITARY WARE

The installation dimensions of WCs are not always identical: In many renovation situations the LAUFEN **Vario outlet** can make it easier to connect the WC to the sewage network.

Both horizontal and vertical outlet wall clearances of up to 305 mm for washdown are possible.

Maximum wall clearance for vertical floor outlet

Minimum wall clearance for vertical wall floor outlet

Horizontal wall outlet

The bowl of the new **LAUFEN pro rimless WC** has no rim. There's no longer anywhere for dirt and deposits to hide; instead, thanks to an innovative and powerful flushing system, everything's flushed cleanly away with both the 6/3-litre version and the 4.5/3 litre version. Both public toilets and private bathrooms can benefit from the easy cleaning and great hygiene of this system.

The latest generation of **LAUFEN water-saving WCs** are optimised to a full flushing volume of 4.5 litres of water. Compared to today's 6/3 litre dual flush these models provide substantial water savings. With an average of 5,000 flushes per WC per year, the yearly water saving is at least 6,000 litres, or more than 27,000 litres if we take into consideration that 9 or even 12 litre models are still in use. LAUFEN WCs marked with the green 4.5/3L logo are not only fulfilling the requirements defined in the harmonized standard EN 997 Class 1 Type 5 and Class 2 (that cover the whole European territory), but also fulfill the challenging Australian requirements of SAI/Wels 4 Stars.

For Laufen the European water label is the most reliable and transparent way for consumers and professionals to clearly appreciate the potential regarding the reduction of water consumption. LAUFEN toilets, cisterns and urinals are developed to reach the highest level of water saving performance. Please note that a suitable downstream drainage system must be built for this kind of water-saving WCs. In case of restrictions of the existing drainage system or local regulations LAUFEN WCs marked with green 4.5/3L logo can also be flushed with standard 6 litre flushing volume.

HiJet WC: A new type of WC having highest-performance flushes with volumes of 4.5 and 6 litres. This unique model unites all worldwide standards. Maximum performance tests have shown that this powerful WC is prepared to meet future standards. It does already achieve outstanding flushing results with 2–3 litres, if the downstream drainage systems are designed for this purpose. LAUFEN has lodged a patent for this new flushing system.

The **intelligent control system** has different modes and can trigger cleaning after each user or at defined intervals with different flush quantities of between 0.5 and 3 litres. Following long periods of non-use, a hygiene flush takes place every 24 hours by default. There is also an integrated overflow protection function in case the drain hole becomes blocked.

Hybrid mode

The urinal flushes at a predefined interval if usage is detected, and not after every single use. The flushing interval can be set to six different values between 1 h and 12 h. A predefined flushing volume is assigned to each flushing interval.

OL

The **LAUFEN lema** 0-litre urinal saves water and money. It operates without water and does not require a water shut-off device or electricity to keep the drain closed. The urine itself helps to keep gases sealed in and to prevent their escape. The principle behind this “trap” is known in the chemical industry as the Erlenmeyer flask.

PRODUCT FEATURES AND BENEFITS: SANITARY WARE

Made-to-measure sanitary ware: Many large LAUFEN washbasins can be manufactured made-to-measure at the factory. Using this innovative production technology, we can manufacture sanitary ware to fit the plan of your bathroom. On the one hand, the ceramic can be cut to size – even on the diagonal. On the other, even freestanding side elements can be custom made without any visible side panel attachments.

The bathroom is private. So that it stays that way, LAUFEN provides **sound insulation sets**, consisting of specialised foam and rubber elements for its washbasins and wall-mounted WCs. These elements considerably reduce the amount of noise due to usage and functions that passes through the wall into neighbouring rooms.

Depending on the structural situation, a sound reduction of up to 9 decibels can be achieved, which means that noise is reduced by almost half.

These sets have been tested against SIA 181 and DIN 4109 and certified by Fraunhofer.

- 89269.1 sound insulation set for washbasins up to 80 cm
- 89269.2 sound insulation set for washbasins of 80–100 cm
- 89269.3 sound insulation set for washbasins of 110–180 cm
- 89269.4 sound insulation set for WC

PRODUCT FEATURES AND BENEFITS: WELLNESS

When choosing the **bathtub material** the choice depends individual preference and intended use. In order to be able to provide the right solution for all situations, LAUFEN provides three different bathtub materials:

Solid surface bathtubs and shower trays:

Bathing in a bathtub made of solid surface material feels like being in a natural basin. Due to a high percentage of mineral particles, the surface feels smooth.

The innovative material also allows an incredible freedom of design: almost every shape is feasible – from very organic to very straight and architectural.

Furthermore the non-porous surface of the material is hygienic, durable, UV-resistant, highly resistant to scratches and can be effortlessly cleaned.

Acrylic bathtubs and shower trays:

Bathtubs and shower trays made of sanitary acrylic have benefits due to the insulating properties of the material and its warm surface. Together with an underlay made of hard foam, the material helps your bath water retain its temperature for a long time. LAUFEN sanitary acrylic is integrally coloured, is light and colour fast and easy to clean.

Steel bathtubs and shower trays:

Bathtubs and shower trays in enamelled steel are hygienic, and resistant to acid, scratching, impacts and abrasion.

LAUFEN steel bathtubs are produced using heavy 3 and 3.5 mm enamelled steel; they are extremely dimensionally stable and come with an anti-slip coating. In addition, they are fitted with a sound insulation system.

Ceramic shower trays:

Modern shower trays made of sanitary ceramics can fit harmoniously into your bathroom. Like any of the LAUFEN ceramic products, they are characterised by their especially long life and tangible high-quality. Our attractive shower trays offer a conveniently low step-in height and can be supplied with an antislip coating, if required.

Whirlpool – Wellness at home: LAUFEN combines the rejuvenating energy of water, air and underwater lighting for reviving massages in your own bathtub at home. A feast for the senses – in total privacy.

1

2

Air nozzles (1):

Up to 90 nozzles positioned in the bathtub floor effectively revive your body all over. The outlets are installed flush with the bathtub floor and therefore do not impede enjoyment of the whirlpool. The warm and tingling ozonised air is blown into the water via air conduits under the base of the tub. The system is self-drying and therefore hygienic and easy to maintain.

Water nozzles (2):

Depending on the model, LAUFEN whirlpools are equipped with between 4 and 8 water massage nozzles. Water nozzles are installed at the sides, the direction and power of which can be individually adjusted. A number of adjustable rotating microjets are used in the back area, and relaxing massage jets are used at the feet.

When ordering whirl systems, LAUFEN always recommends to order bathtubs with acrylic panels or to install removable tiled drywalls for easier access in case of maintenance. If you can't avoid bricking in the bathtub, please plan large inspection chambers of minimum size 50x50 cm so that technical parts remain accessible. The installation of an additional ventilation grill is compulsory.

PRODUCT FEATURES AND BENEFITS: WELLNESS

Coloured lighting appeals to all senses. LAUFEN offers two different types of lighting: either underwater LED lamps illuminate the water or a LED strip in the overflow slot (used in Kartell by LAUFEN bathtubs) creates a relaxing atmosphere. Usually the colours of the LED lights change continuously, but one colour can also be selected via the sensor control system or remote control.

The LAUFEN **wellness remote control** is installed on our top whirlpool models and ensures maximum comfort. The water-proof casing of a media player has a sophisticated design and conceals state-of-the-art technology: As well as controlling the whirl system, the system also includes an MP3 player, a built-in radio and an amplifier with a powerful 4.1 Surround Sound system. Naturally, the remote control system also contains preset whirl functions specific wellness requirements. The remote control is kept on the rim of the bathtub, where hidden magnets hold it firmly in place.

The wellness functions of the LAUFEN whirlpool can also be controlled by **touch-sensitive areas** on the bathtub rim: The system is safe, scratch-resistant, hygienic and easy to clean – and does not detract from the aesthetic of the bathtub.

Many of LAUFEN bathtubs are available with precise-fitting sanitary acrylic skirting for a variety of installation situations. These **acrylic panels** are secured quickly and easily using a magnetic mounting system and are an alternative to labour-intensive bricking in of the tub. These panels are made of the same high-quality and easy-to-clean acrylic as the tubs and allow easy access to the plumbing under the tub for maintenance purposes.

A bathroom that is properly installed and perfectly arranged helps to achieve a balanced and harmonious atmosphere. That's why LAUFEN offers a suitable **styrofoam carrier** for each drop-in bathtub (except the ones with whirl system). These carriers simplify the mounting of the bathtub enormously: mounting is quicker and cleaner, because there is no brickwork necessary, and tiling is also much easier on the perfectly accurate surface of these unseen helpers.

The LAUFEN **installation kit** made of hard foam allows a wide range of shower trays to be installed flush with the floor – and also assists with sound and heat insulation. A protective peripheral strip securely permanently prevents water from entering between the tiles and tray.

LAUFEN bathtubs and shower trays conform to applicable European standards and are tested and monitored on-site by the independent testing institute LGA Quali Test GmbH.

LAUFEN **sound insulation sets** for bathtubs and shower trays significantly reduce the transmission of sound to neighbouring rooms and ensure a private, undisturbed bathing experience – without disturbing the neighbours. Irrespective of the structural conditions, a sound reduction of 10 or even 16 decibels can be achieved. Even a 10-decibel reduction corresponds to a 50% reduction in audible noise. LAUFEN sound insulation sets are tested against SIA 181 and DIN 4109 and are certified by Frauenhofer.

Antislip is a surface treatment which is applied to glazed and enamelled surfaces and then fired on and is thus optimally integrated into the surface structure. The surface offers a secure grip and is also easy to clean, and resistant to acids and scratching. Antislip has been tested against the German industrial standard DIN 51097 and offers higher than average antislip performance. With or without antislip, LAUFEN shower trays feel comfortable on the skin.

PRODUCT FEATURES AND BENEFITS: FURNITURE, LIGHTS AND MIRRORS

Furniture surfaces in the bathroom are designed to deal with the room's special climate conditions. LAUFEN provides a range of different surfaces, all optimised for their intended use and come with a guaranteed long useful life.

Real wood veneer:

A cosy bathroom in wood. The classy wood veneers provide the haptics and optics of real wood. They are resistant to moisture and equipped with reinforced edges, making them resistant to impacts. These real wood veneers include those used in Lb3 and ILBAGNOALESSI One 'noce canal-etto'.

Film coatings:

Film coatings are pulled over corners, thus ensuring the furniture surfaces are joint-free and not sensitive to water. They are scratch, water and light-resistant. Their flexibility offers a great deal of design freedom in terms of the forms used, such as integrated handles, for example. LAUFEN uses film coatings in its LAUFEN pro, moderna plus and case ranges.

Painted furniture surfaces:

Our classic high-gloss paint finish, using two-component water-resistant paints, offers perfect surfaces with no unevenness and a wide range of colours. LAUFEN painted surfaces include the ILBAGNOALESSI One white furniture and LAUFEN also offers 38 additional special paints (shown on right) for the case and LAUFEN pro furniture ranges.

Tidy storage systems in drawers of the ILBAGNOALESSI One bathroom furniture range ensure tidy storage and prevent the return of chaos every time a drawer is closed fast.

Slamming of doors is not inevitable: At LAUFEN, **soft close** means gently-closing furniture doors and drawers. The system is integrated as standard into all LAUFEN furniture. In this case, quality can be felt and not heard.

Comfort in every detail: The flexible and adjustable **3D mounting system** makes installation LAUFEN furniture on the wall quick and easy.

LAUFEN undercounter furniture is exclusively equipped with an innovative **space-saving siphon** (1). This dispenses with the need for siphon cut-outs in the drawers (2), reclaims valuable storage space and ensures unlimited use of internal space.

PRODUCT FEATURES AND BENEFITS: FURNITURE, LIGHTS AND MIRRORS

1

2

Light in the bathroom – for bathing in light: With illuminated mirrors and mirror cabinets, LAUFEN offers a wide range of individual lighting solutions. From integrated LED lighting (1), to fitted lamps (4), to glass-edge lighting (3) in the cabinet shelving, from indirect atmospheric lighting (2) which lights up the entire room to optimum useful light directly in front of the mirror for applying make up or shaving.

3

4

As an option for the case mirrors, LAUFEN offers an integrated contact-free **sensor switch** for mirror lighting. This means you can switch the light on by putting your hand near the mirror, without having to touch the mirror at all.

The lighting elements used in LAUFEN illuminated mirrors in the case range can be replaced very easily and quickly. The mirrors can remain on the wall during this process. As is the case with all electrical equipment in the bathroom furniture – they are protected from all directions against splash water and dust according to protection class IP 44.

Showerstations

The new generation of showerstations offers a host of advantages that provide a unique showering experience: From simple designs to different settings and functions.

Slim, simple rain shower head
 ø 300 mm or 300 x 300 mm, 2 mm deep, in chromed stainless steel, immediate non-drip water stop. shower head arm can be locked and swivelled horizontally by ±60°.

Easy handspray height adjustment
 Push-action holder: simply press the button at the side, adjust height, let go and the spray is securely fixed..

Adjustable wall mount
 The water-carrying shower rail fastener can be adjusted during mounting:
 - height and lateral compensation ±5 mm
 - depth compensation -7 mm / +10 mm

One-handed thermostat control
 Temperature and flow regulation at one side. Particularly helpful: thanks to smart water circulation, the faucet body does not get hot.

Smooth MyTwin & MyCity hand-sprays included
 Luxury handsprays with three spray modes and SmartSelect switchover function.

Discreet diverter
 Positioned below the faucet, the simple and unobtrusive diverter switches from hand to rain spray.

Handshowers MyTwin & MyCity – Design with meticulous attention to detail

Convenience with a high pleasure factor

LAUFEN hand sprays not only look smart, they are smart. The 120 mm sprays feature the "Rain-Spray" option, the "MassageSpray" and a combination of both spray types, the "MixedSpray". A press of the SmartSelect button switches conveniently between a gentle rain shower and vigorous massage spray. The integrated air mix enhances the soft pleasant showering experience. Thanks to RubiClean limescale residues rub off quickly and easily to ensure many years of unadulterated showering pleasure.

RainSpray

MixedSpray

Technically savvy

However arva's modern hand spray technology offers even more. All sprays are supplied with the "Ecochoice" limiter. It limits the water rate to 5.7 l/min and therefore bears the 'A' energy label. Anyone preferring a higher water flow of 11.3 l/min, can remove the controller manually. Special attention was paid to the choice of materials used. All water-conveying parts are made of quality materials that comply with drinking water ordinance requirements. Thanks to the smart technology inside the hand sprays do not heat up, and thus offer perfect protection against scalding.

MassageSpray

SmartSelect
