

HEATHFIELD & Co

THE LINDEN COLLECTION

H&C

Heathfield & Co collaborate with interior designers to create decorative lighting for fine interiors. For over 40 years, we have refined the process of designing and constructing exceptional lighting.

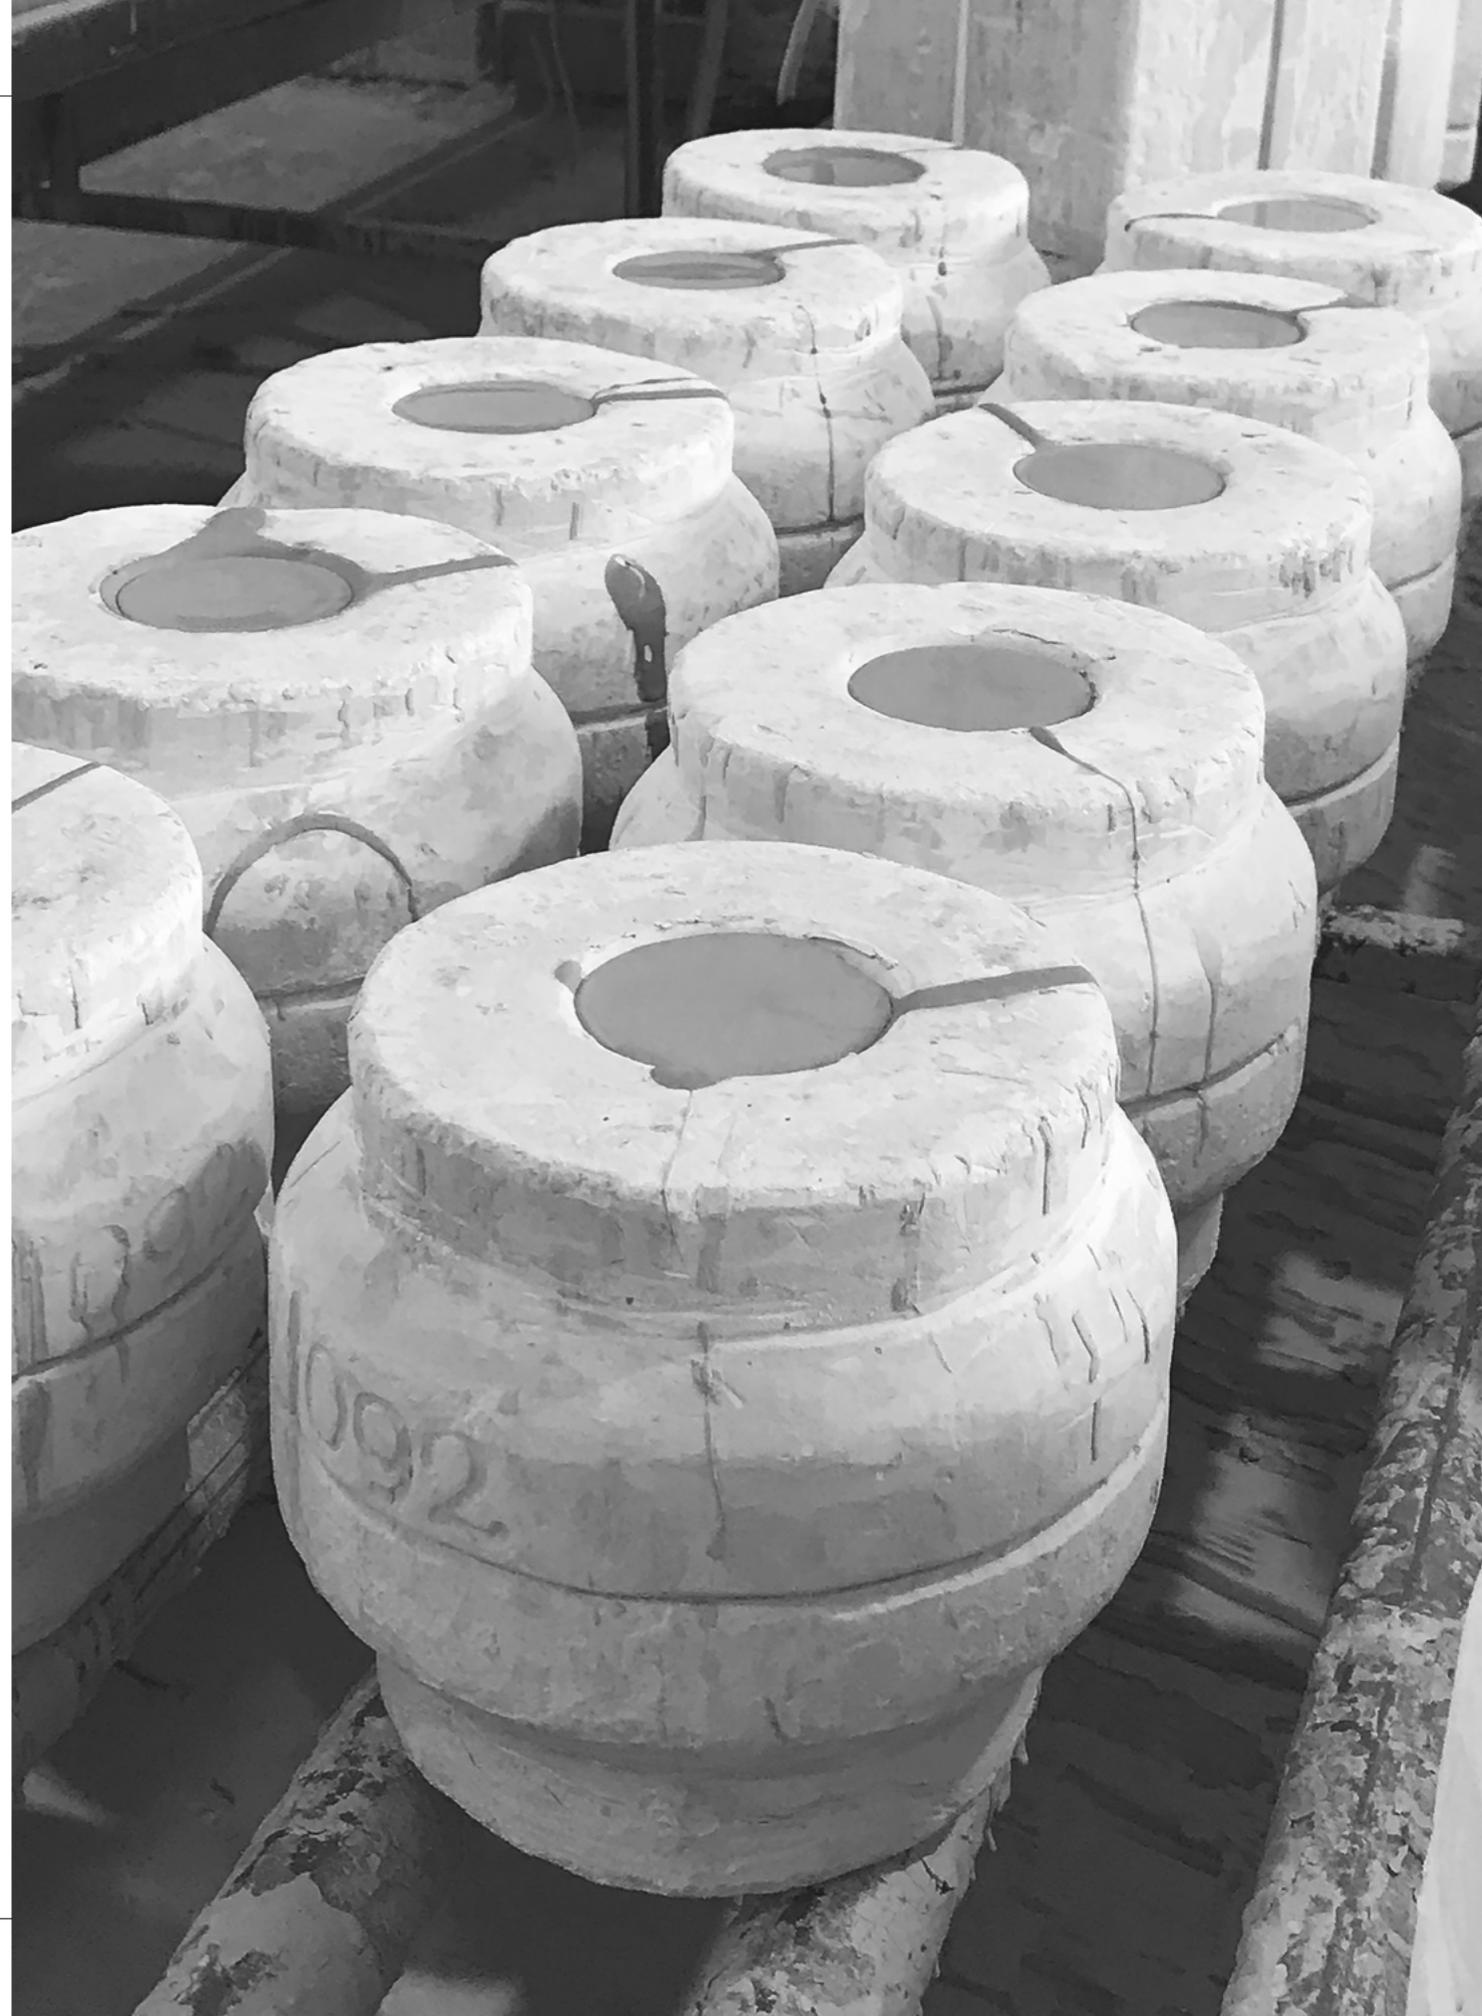

All our products are exclusively handmade to order, allowing us to give our undivided attention to every stage of the production process.

Decorative lighting for beautiful spaces

We invest time in understanding how interior designers develop, design and style rooms for their clients. We absorb their influences and sensibilities. Most importantly, we have the technical and aesthetic knowledge to deliver exactly what they envisage. At the heart of this experience is a deep empathy and understanding of our customers. To make something of beauty, we must first share the same vision.

THE LINDEN COLLECTION

BY HEATHFIELD & CO

Inspired by the purity of spring and botanical forms, our Linden Collection references natural textures throughout. This considered curation of table and floor lamps, wall lights and ceiling fittings come together to deliver a harmonious and fluid range of striking pieces with a contemporary edge.

Each unique piece combines organic shapes with soft sculptural lines and tactile surfaces. Ripples, flutes, scalloped edges and subtle crackle patterns feature in a delicate palette of muted greys, neutral greens and off whites.

CAMELLIA TABLE LAMP

A petite rounded base with a subtle crackle glaze finish, our Camellia table lamp captures the beauty of the finer details found in nature, reflecting the delicate veins running through petals and leaves.

ASTER & FERRO TABLE LAMPS

The refined curves and soft edges of our Aster table lamp make it one of the most organic forms in the collection. Echoing the symmetry of Aster in a slightly taller form, the Fero table lamp combines the same soft edges with an additional angular section.

Fero & Aster

Aster and Fero both draw inspiration from subtle textures in natural minerals, rocks and stone. The lightly grained surface enhances the depth of each lamp, adding a distinctive and tactile finish.

ALPINA CHANDELIER

With five curved arms designed to imitate the stems of the alpine flower, our Alpina chandelier has a sophisticated form, highlighted with clear glass accents. Its central stem is housed in a borosilicate glass cylinder, whilst each arm is finished with a delicately bubbled glass disk, perfectly diffusing the light.

IVY & LAUREL TABLE LAMPS

A delicate colour gradient transitions our Ivy and Laurel table lamps from a deep moss green at the base to a light spring white at the top. The hexagonal honeycomb structure on the surface features strong lines and deep ridges, mirroring the complex prism shapes seen on the surface of the Ivy and Laurel leaf.

Laurel

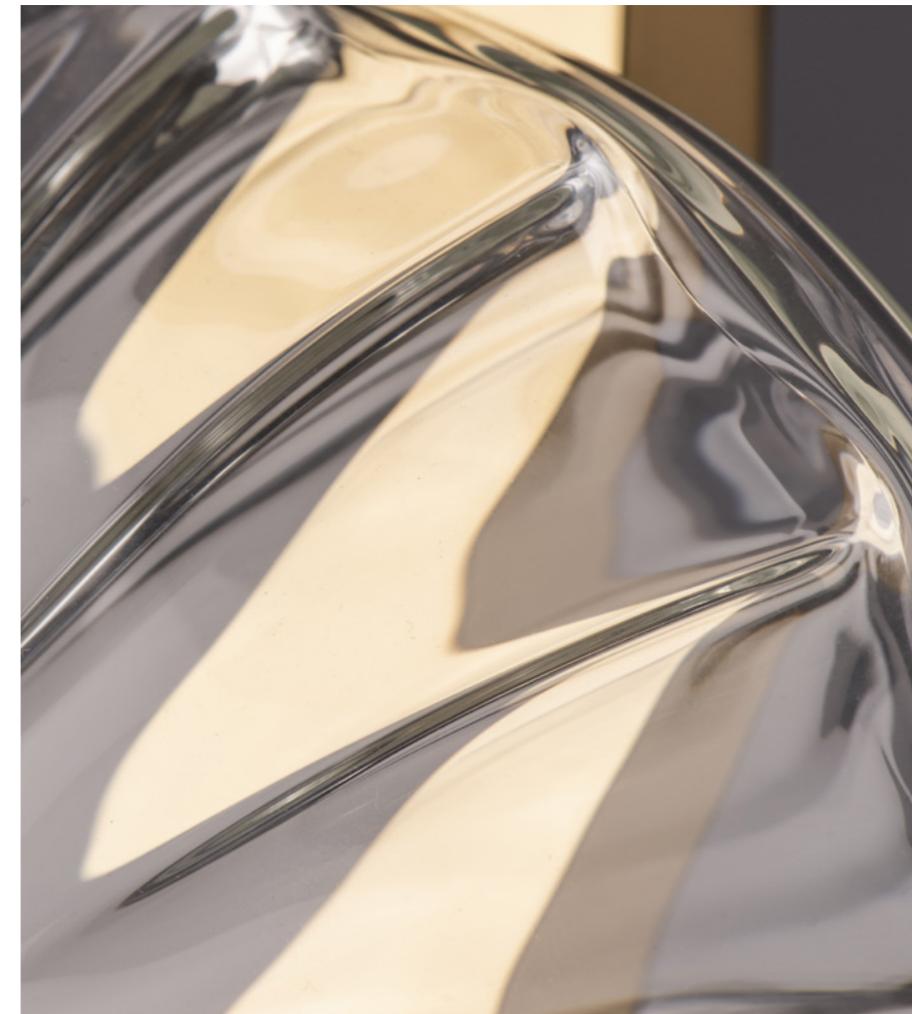

MILA ROUND PENDANTS

Delicate sweeping arms lead to seed shaped convex glass shades in both our four and six arm Mila round pendants. Inspired by a blossoming flower bud, each glass shade is gently fluted from the edge towards a central point, allowing the directional light to shine through.

MILA LINEAR PENDANTS

The Mila family extends in a classic linear formation that celebrates simple clean lines and crystal clear glass. The two light pendant positions the glass above and below the arm in a contemporary configuration, whilst the four light option features the fluted glass heads suspended below a central sweeping arm.

LUCI CHANDELIER

By far the largest piece in the Linden collection, our Luci chandelier is a true centerpiece, designed to draw focus in the finest interiors. Eight rippled glass shades refract light organically across their surroundings, casting reflections in the crystal sphere drops below.

*Elder*

CEDAR & ELDER TABLE LAMPS

Finished in pure white, the petal like structures of our Cedar and Elder table lamps are beautifully tapered from the base and have a deeply tactile form. Each soft ridge runs vertically, allowing light to fall and create unique contrasts and shadows across the ceramic.

With their decorative ribbed detail and neutral palette, the pod sized Elder or elongated Cedar provide an elegant contemporary aesthetic, suitable for any interior scheme.

NIVALIS

Taking inspiration directly from spring flowering snowdrops, the Nivalis range features glass shades reflecting the classic bell shaped flower and pointed petals. In a beautiful white dappled finish, each glass shade is unique and complemented with considered metalwork in the form of a snowdrop stem. The Nivalis family consists of a wall light, floor lamp, single drop and four light pendant.

HEATHFIELD & G

ALBA TABLE LAMP

The tapered leaves of the Alba stem from the center of its ceramic body, rippling outward to a defined scalloped edge. Its muted grey colour graduates through the textured surface, reflecting how colour diffuses across the soft petals of a white water lily.

We offer a wide range of lampshade fabrics, lining options and a variety of flex options, providing you with the scope to customise many of our products.

Our comprehensive range of shades and palette of both neutral tones and vibrant hues provide an unrivalled level of versatility to enhance the aesthetic of your interior scheme. With the flexibility to customise the shape, size and finish of your lampshade, our bespoke service allows you to perfectly realise your own creative vision.

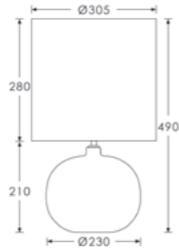

Lampshade production lies at the heart of our design and manufacturing heritage, reflecting over 40 years of expertise
