

LIQUI CONTRACTS

WHO WE ARE

Liqui Contracts forms part of Liqui Group Ltd., which was initially started by designer/maker Cameron Fry in 2007 with the aim of establishing a design practice with a multi-disciplined approach. We design and manufacture contract furniture and lighting for architects, interior designers and clients engaged in projects around the world. We have become known for creating contract grade products that have a domestic aesthetic; giving them both durability and a friendly appeal with their distinctive style.

OUR APPROACH

Liqui Contracts' innovative and award-winning commercial furniture and lighting is designed and made in Britain. Our design studios deliberately overlook our main workshop making it easy to maintain a strong link between our process-led design approach and how our products are made. We are furniture makers with an artisanal attention to detail and a passion for quality materials and sustainability. By combining modern technology with traditional techniques, we can achieve the highest standard of finish while sustaining large-scale production.

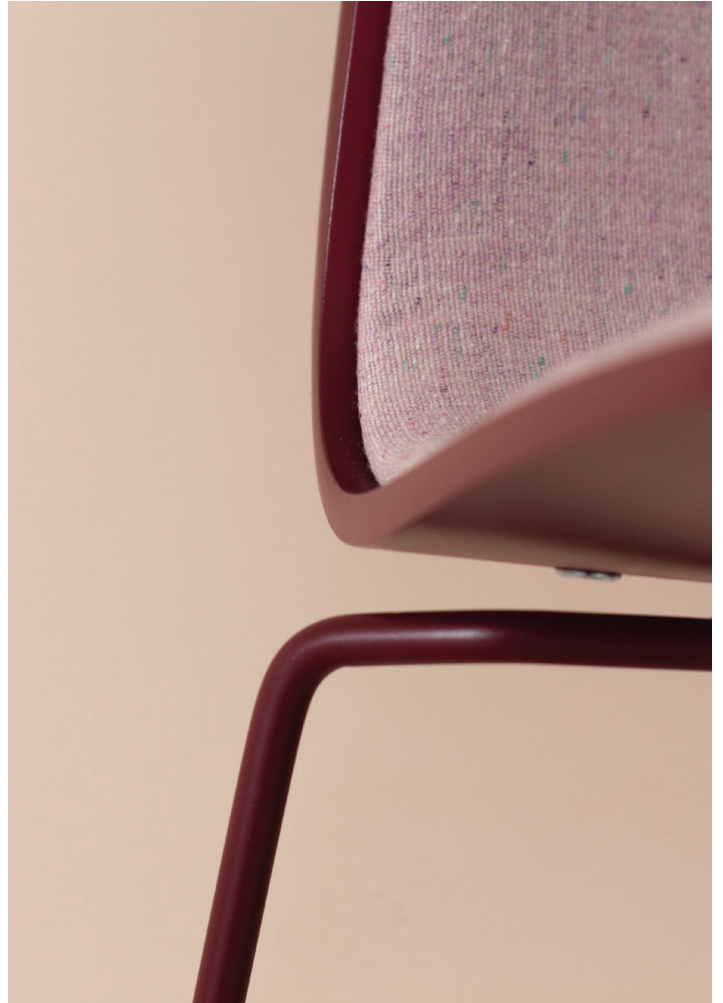

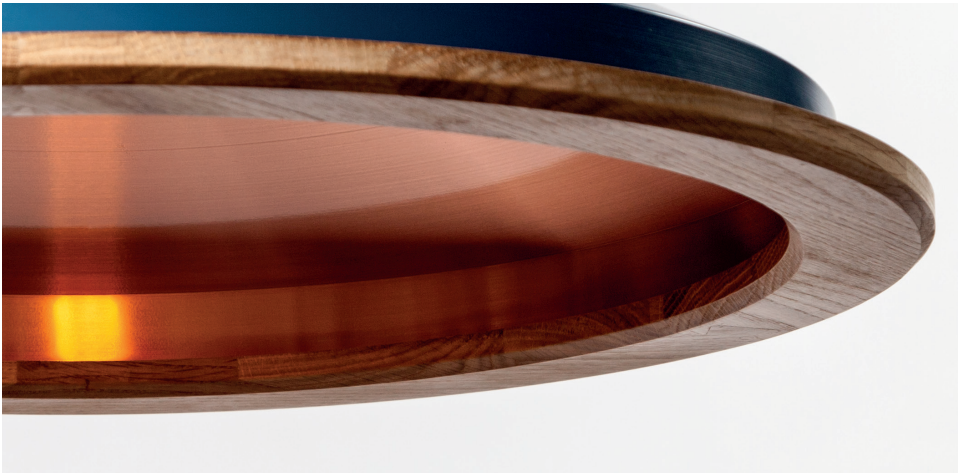

CUSTOM COLOURS, FINISHES AND MATERIALS

Liqui Contracts bespoke furniture makers offer a range of choices for colour-ways, finishes and materials on most of our contract furniture and lighting. Through well-considered design, our contemporary handcrafted products lend themselves to a variety of options and interpretations making them ideal for any number of commercial interiors. By combining design expertise with modern workshop craftsmanship, we always strive to meet our clients' requirements and expectations. With the utmost care and attention to detail, we help clients realise their ideas – transforming them into reality through our custom furniture and lighting options.

BESPOKE DESIGN, JOINERY AND MANUFACTURE

Alongside our existing range of commercial furniture and lighting, our in-house studio/workshop with CNC capabilities offers a bespoke design, joinery and manufacturing service. According to your brief, the Liqui Contracts team can design, prototype and produce almost anything you may require for your commercial interior; from bespoke counters and lighting features to beautifully crafted pieces of furniture.
