

CARPETS

UK distributors.

MADE IN GERMANY

Design and quality, based on tradition.

ABOUT US

Newmor specialise in commercial fabric-backed vinyl quality, wide-width wallcoverings. We have thousands stocked surfaces, customisable prints, designer collaborations and an in house graphics department. A family owned business, started in 1967, we take pride in manufacturing all of our wallcoverings at our factory in Wales, UK. We use traditional manufacturing techniques, alongside cutting-edge new technology to bring you the best in design and quality.

to our offer. For more than 140 years, the name Halbmond has represented quality.

Halbmond's philosophy corporate traditional values, a rich encapsulates heritage and innate pride in the quality state-of-theproducts with o f technology, creative freedom, social responsibility and the ability to meet the most individual demands.

HISTORY

Halbmond began in 1880 with the founding of what was to become Germany's largest weaving mill, in Oelsnitz, Germany. The synergy between Newmor and Halbmond runs right to the core, with a commitment from the founders to setting up business in their home towns. They were aware of the power inherent in a clear commitment to their home region and pressing ahead with innovations for the international market. We are proud that this tradition continues to form the basis for our quality-conscious manner of conducting business.

SAFETY

The high quality of Halbmond carpets ensures that they remain durable for many years and suitable for use even in high traffic areas.

All of our carpets are CE certified. There is a wide selection of specifications, all are fire rated to at least Cfl, most of them to Bfl.

Our products are made of high-quality polyamides and free of allergens and irritating substances.

Carpet has a positive effect on acoustics, helping to significantly reduce the noise level as well as the reverberation times. The optimal effect can be achieved with our Felt 1000 backing, which achieves a footfall sound reduction of up to 31db.

Carpeting also has ergonomic benefits in comparison to hard flooring - pressure and impact is reduced.

There are many advantages to using carpet over hard flooring - including positive acoustic and ergonomic effects. Our carpets are all fire rated to commercial standards, free of allergens and irritating substances, and suitable for even the highest traffic areas.

TECHNOLOGY

We are able to produce designs in an endless variety with only four primary colours in a digital process with our 4-meter wide Colaris and Chromojet printers. The printed colour penetrates all the way to the base, meaning high durability and minimum wear and tear.

Significant investment in the latest high definition, total pile penetration print technology allows us to produce bespoke carpets of the very highest quality, and keeps us at the forefront of design and technological innovation.

BESPOKE

Alongside all of our collections we have the technology to create bespoke designs based on your own ideas or using your artwork.

STEP 1: Briefing

You have an idea? Draw a sketch. Take down notes. Collect material such as cloth or paper. But most of all: talk to our designers about your ideas.

STEP 2: Design

Our experienced design team will implement your ideas, plan colours and provide you with a print.

STEP 3: Planning

You will receive a project sample. From there we can fine tune the design and colours.

STEP 4: Production

Our factory print your product in the highest quality. The laboratory prototype you confirmed will be an obligatory template for colour, design and quality.

STEP 5: The final product

After sample approval, manufacture and quality checks, your carpet will be dispatched.

SUSTAINABILITY

Our GUT certification ensures that our products are regularly tested for harmful chemicals and emissions. We are required to strictly comply with ecological production standards and to meet our responsibility to ensure clean air and water supplies. Additionally, we have committed to permanently improving all environmental aspects of our production processes — such as recycling and making economical use of valuable raw materials. This has already been achieved 100% with the Xtra acoustic backing: it is made entirely of recycled felt.

Reconciling economic and ecological responsibility has always been part of our corporate philosophy. Halbmond is audited in accordance with DIN EN ISO 9001. At the same time, they voluntarily submit to one of the world's strictest test and inspection systems — certification by GUT (Association of Eco-friendly Carpets).

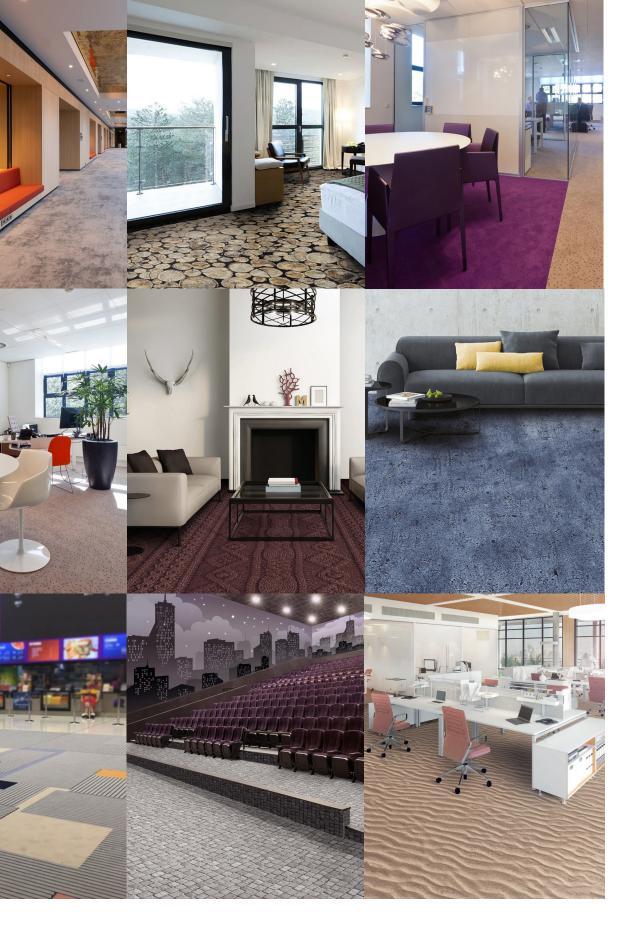

PRODUCTS

Our designers are continually working on new collections. All available in a wide variety of finishes, specifications and backings.

The trend towards individuality and a comfortable, homely atmosphere, is becoming more important in commercial interiors. Having a wide variety of designs and colours, as well as bespoke printing, results in endless options to create a unique space.

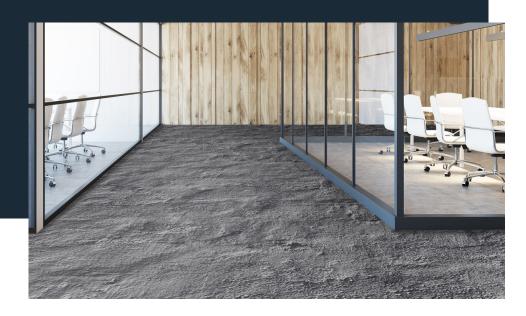

Choose from one of our standard designs or create something bespoke for a totally unique space!
