# MERIDIAN COLLECTION

**Threads 'Meridian'** is a stunning interpretation of the organic forms and extraordinary colours of the natural world around us. Inspiration has been drawn from the serenity of the azure blues of the oceans, the blaze of a breathtaking sunset and the layered neutrals of ageless rock formations.

The collection includes gorgeous silky jacquards and beautiful printed linens, their abstract designs composed in colours ranging from striking peacock blues and greens to glowing pinks and spice.

Billowing sheers in an unexpected palette of mineral shades such as pewter, silver and bronze lighten into soft pinks, creams and ivories. The atmospheric light diffusing qualities of these flowing fabrics, some with sparkling metallic threads, will create a wonderfully glamorous environment.

The simplicity of the rich washed linens, in saturated colours reflecting nature's own, centres on their pleasingly robust texture and open, uncluttered look. Superb slub velvets echoing a similar palette have been designed to integrate across the entire Meridian Collection and its perfect mix of texture and colour defines the unique spirit of Threads.
